Privacy & Security

SSO (Single Sign-On)

With Single Sign-on, or SSO for short, agents have a single login across all apps your team is using. It makes life easier and more secure for everyone and reduces administrative overhead.

Two-factor authentication (2FA)

Two-factor authentication (2FA) is an additional layer of security for your account. It contains two steps of logging into the account.

TimeCamp statement regarding EU time tracking regulations

Recently, the European Court of Justice (ECJ) ruled, that all the member countries of the European Union should provide “an objective, reliable and accessible system” that allows the companies to track their employees’ working hours.
