Editing, copying, and moving time entries

We prepared a few options which will help you to edit and make some changes to tracked time. Here you'll find information about editing the timeframes of your entries, moving, merging, and copying them to other days. These instructions are also helpful if you would like to check the correctness of your timesheet at the end of a workday or prepare some plan for the next week using the copying feature.

Administrators and Supervisors are able to view timesheets of users who they manage using the “User picker” option.

Editing time entries

[Timesheet](#) allows you to create time entries for the past or future days, edit their timeframes, change the assigned tasks, add or change tags and notes, and delete entries.

To edit time entries for the past days, use the **Date range** filter on your Timesheet and select the day or week from the past.

To change the assigned task, simply click on the current one and then select a new task from the task picker.

To edit the timeframes of entry in a Day view just hover your mouse over the specific entry and decide which value you wish to edit first (from/to/duration).

The lock informs you which value will stay unchanged.

First, click on the value you want to keep and leave it unchanged. Next, click on the value you want to change.

For example: if you wish to keep the duration and change the start time, click on duration (leave it unchanged), then click on the start time and change it. The end time would be adjusted automatically.

Your browser does not support HTML5 video.

For example: if you wish to keep the end time and change the start time, click on the end time (leave it unchanged), then click on the start time and change it. The duration time would be adjusted automatically.

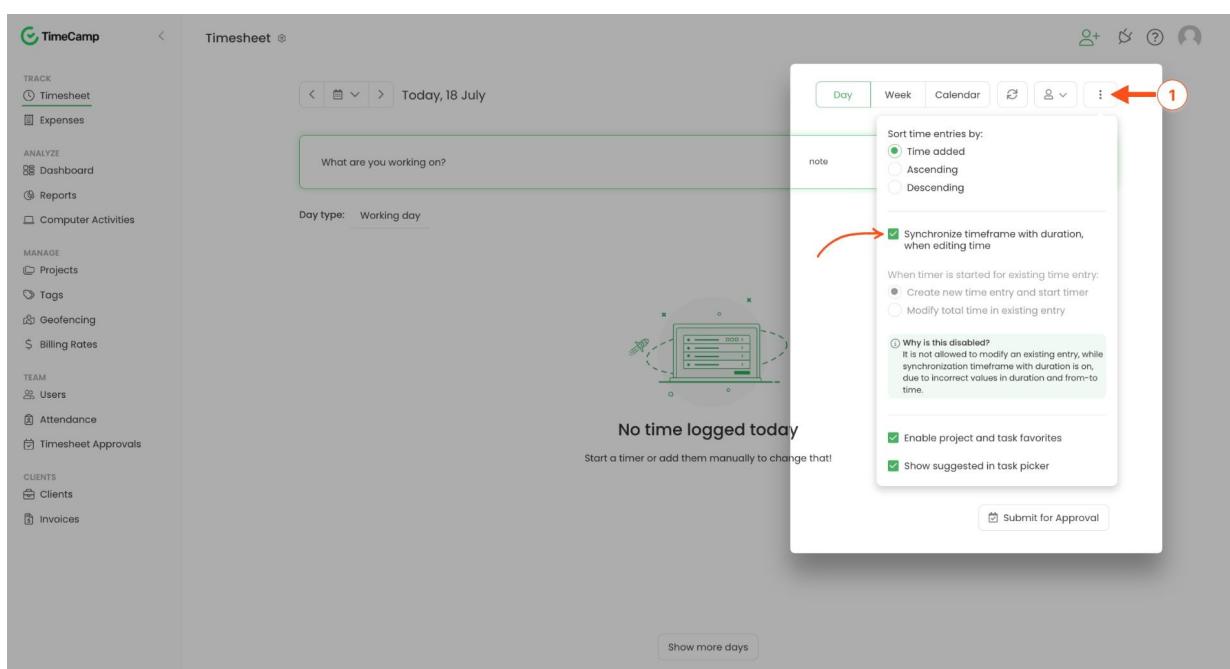

Your browser does not support HTML5 video.

In a Calendar view simply move the borders of the time entry to change the time or click on the specific entry to change the start or end time in the edit panel.

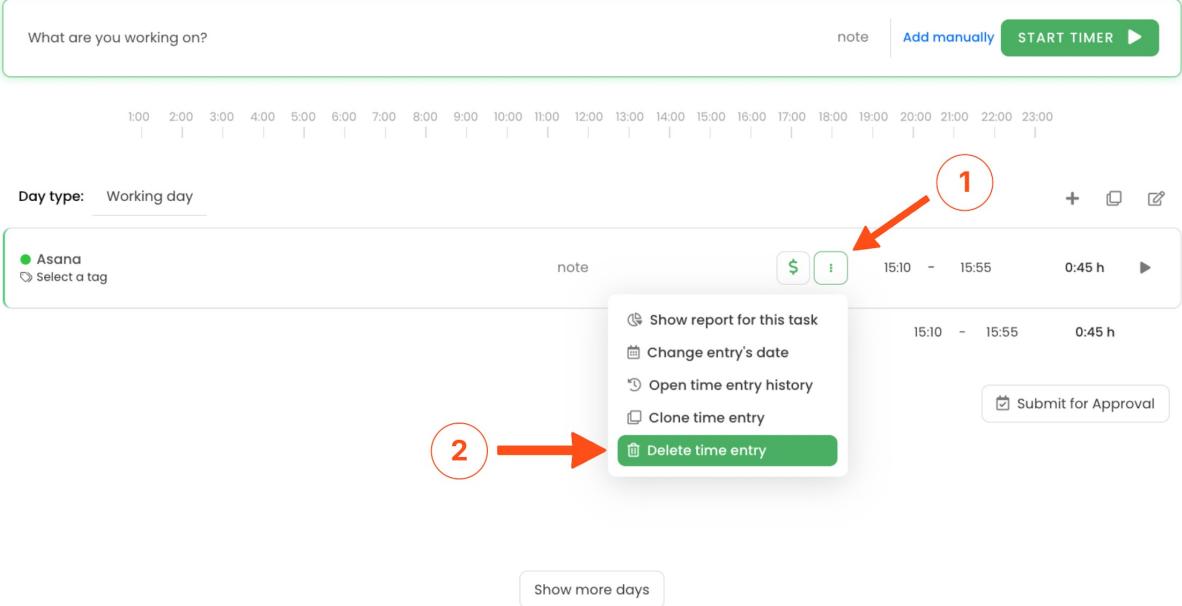

Your browser does not support HTML5 video.

The additional option which can help to edit time entries in a simple and fast way is to turn off the **"Synchronise timeframe with duration when editing time entry"** setting on your Timesheet.

If you turn off the setting **Synchronise timeframe with duration when editing time entry** while editing time frames, values that are not edited won't change. For example, if you change the start time, then the end and duration time will stay the same, they won't be automatically adjusted.

To delete a specific time entry, hover your mouse over a specific entry, then find some additional options by clicking on 3 vertical dots icon and click **Delete time entry**:

The screenshot shows a digital timesheet interface. At the top, there is a search bar with the placeholder 'What are you working on?' and buttons for 'note', 'Add manually', and 'START TIMER'. Below the search bar is a timeline from 1:00 to 23:00. A specific time entry is highlighted, showing a duration of 0:45 h from 15:10 to 15:55. The entry is associated with the task 'Asana'. A context menu is open over this entry, with option 1 (Delete time entry) circled in red and an arrow pointing to it. Option 2 (Delete time entry) is also circled in red and has an arrow pointing to it. Other options in the menu include 'Show report for this task', 'Change entry's date', 'Open time entry history', 'Clone time entry', and 'Submit for Approval'.

Once an entry is deleted the action can't be undone and data can't be restored.

Here you can learn more about viewing the history of editing Timesheets.

Moving time entries

To move the time entry to another day click on the option **Change entry's date** and click on the day you would like to move this entry.

What are you working on?

note | Add manually | START TIMER

Show more days

The drag-and-drop method can also easily merge entries within a specific day. Simply “catch” the desired entry and move it to a different task. Remember to turn off the option “**Synchronise timeframe with duration when editing time entry**” before merging entries.

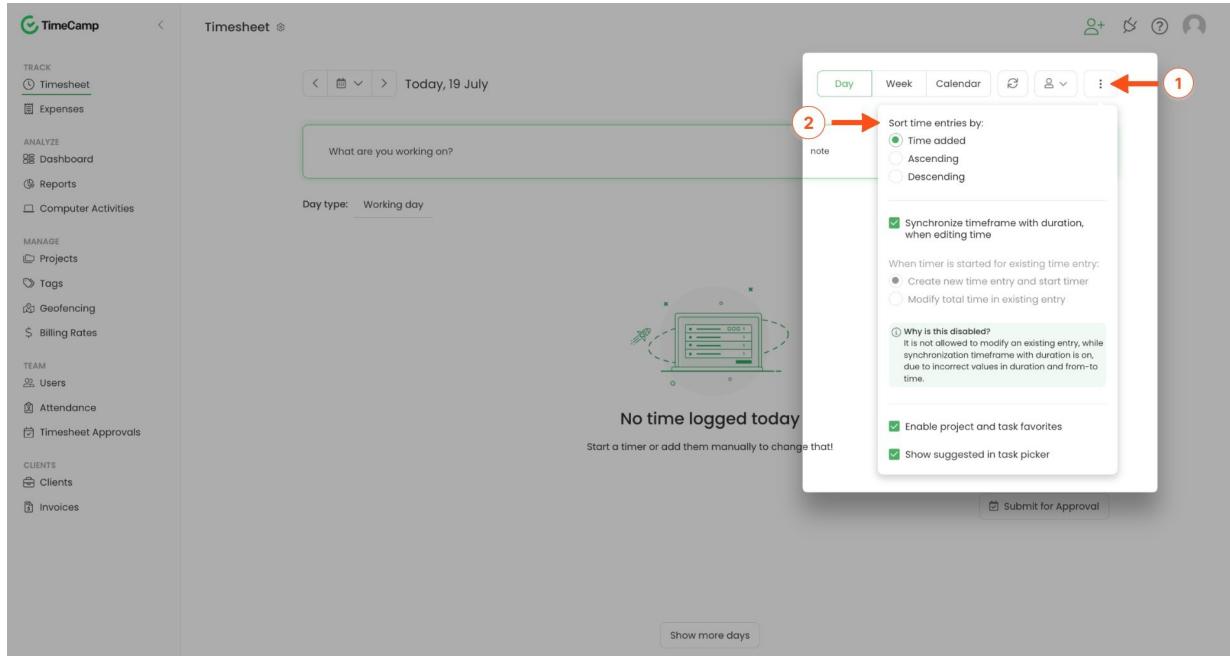

The screenshot shows the TimeCamp Timesheet interface. On the left, there's a sidebar with various navigation links: TRACK (Timesheet, Expenses), ANALYZE (Dashboard, Reports), MANAGE (Projects, Tags, Geofencing, Billing Rates), TEAM (Users, Attendance, Timesheet Approvals), and CLIENTS (Clients, Invoices). The main area is titled 'Timesheet' and shows the date 'Today, 19 July' with navigation arrows. A text input field says 'What are you working on?'. Below it, 'Day type: Working day' is selected. A central area displays a small icon of a computer monitor with a timeline and a timer. Below the icon, the text 'No time logged today' is displayed, followed by the sub-instruction 'Start a timer or add them manually to change that!'. A 'Show more days' button is at the bottom. A context menu is open on the right, with a red arrow (labeled 1) pointing to the top right corner of the menu. The menu has tabs for 'Day', 'Week', 'Calendar', and 'More' (with a person icon). The 'More' tab is highlighted. The menu content includes: 'Sort time entries by:' (Time added, Ascending, Descending), a checked checkbox 'Synchronize timeframe with duration, when editing time' (indicated by a red arrow 2), a note about timer start for existing entries (Create new time entry and start timer, Modify total time in existing entry), a question about why it's disabled (it's not allowed to modify an existing entry while synchronization timeframe with duration is on, due to incorrect values in duration and from-to time), and two checked checkboxes at the bottom: 'Enable project and task favorites' and 'Show suggested in task picker'. A 'Submit for Approval' button is at the bottom right of the menu.

Your browser does not support HTML5 video.

Merging will sum up the duration time of both entries and adjust their timeframes.

Moving and merging time entries is possible only in a Day view.

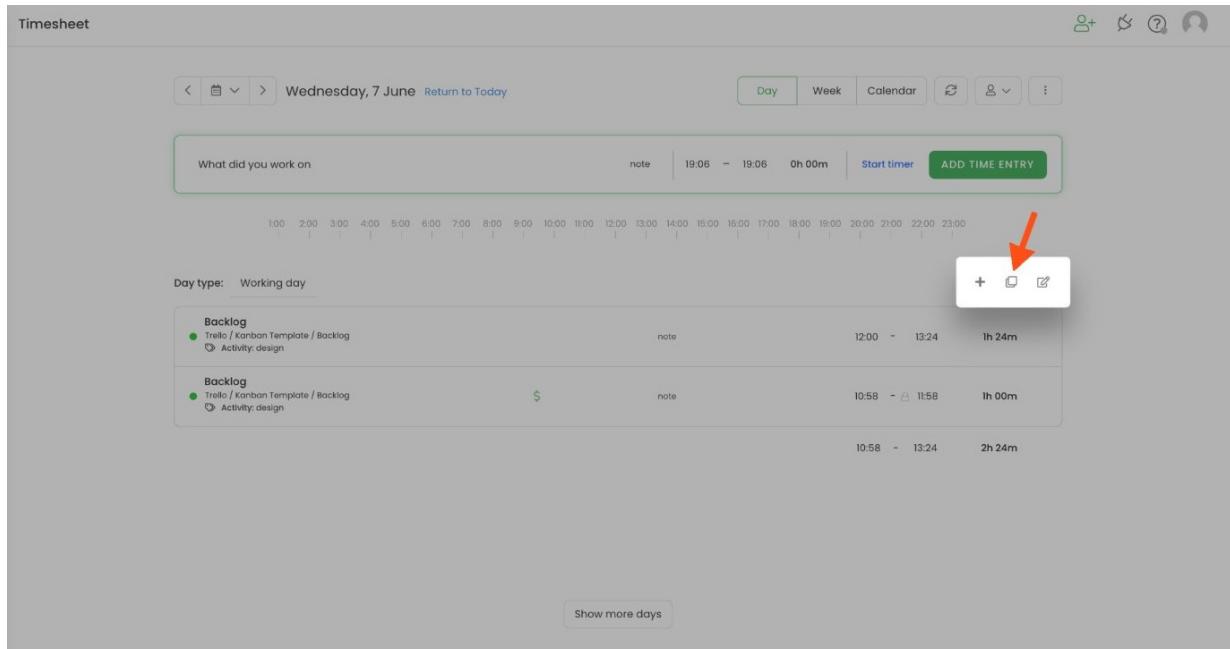

If you would like to sort entries please use one of the available options from the menu: **by time added, ascending, or descending**. It is not possible to sort or change the order manually.

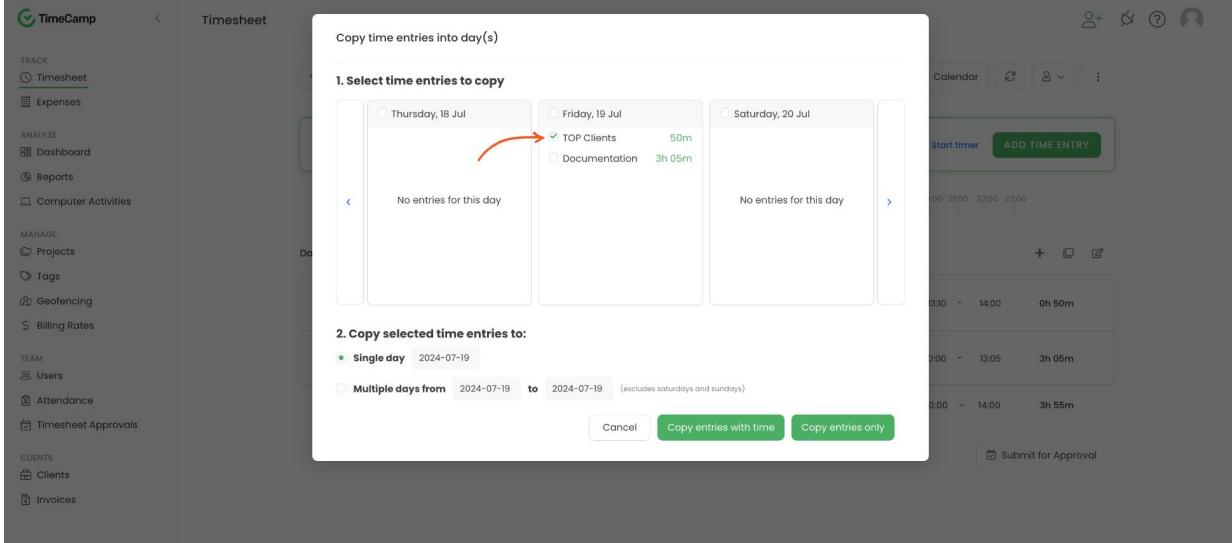

Copying time entries

Copying options are not available in a Calendar view.

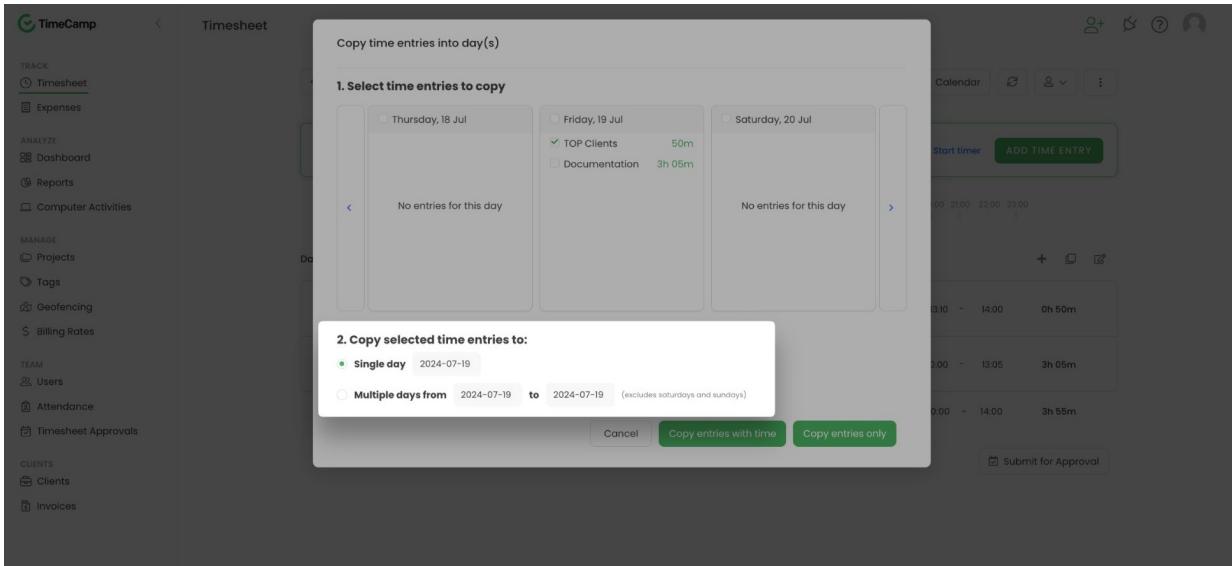

To copy entries or the entire timesheet to any other day simply click on the **Copy time entries from the different days** button, which is located in the right corner of your Day Timesheet.

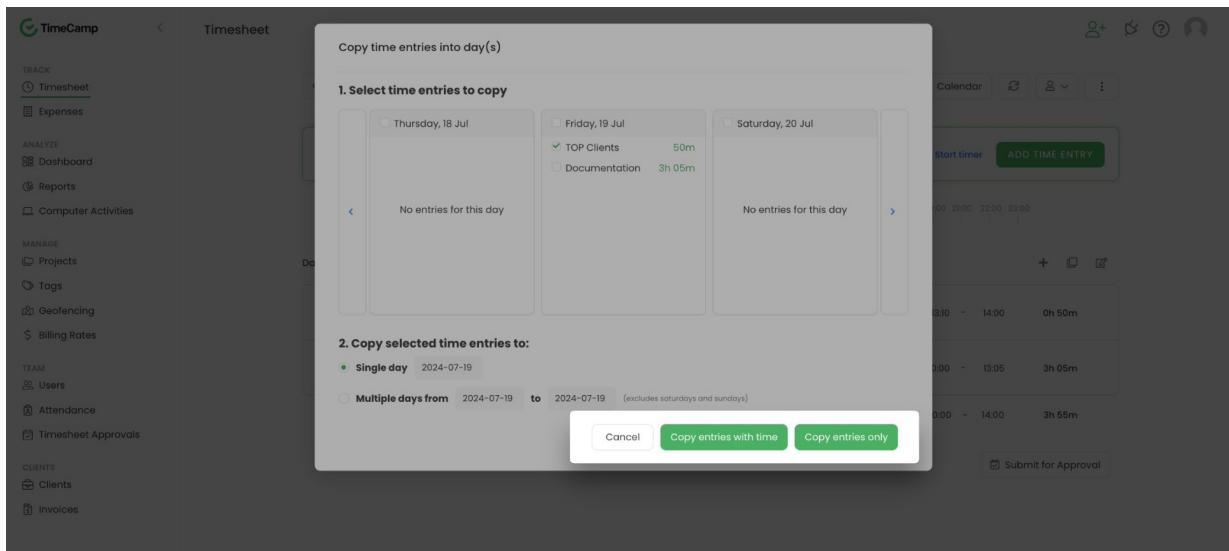

In the first step, select which entries you want to copy. You can choose as many of them as you want. Tick the checkboxes next to the entries you want to copy, or (optionally) select an entire day.

In the second step, specify the dates, to which data will be copied. Pick a single day or specify the date range whereas weekends won't be included.

The final step is to hit the “copy” button. It is possible to copy only the list of entries or also the list of entries with their duration and start/end time.

One more option to copy a time entry is to simply **clone it within a selected day**. A new entry with the same task will be added within that day and you only need to adjust its' timeframes.

What are you working on? note Add manually START TIMER
