Trello power-up

Apart from the browser plugin, you can also use TimeCamp Power-Up in Trello. It will allow you to **track time** and generate time reports on any Trello card to know on which tasks you spent most of your time. Gain insights on projects without leaving Trello.

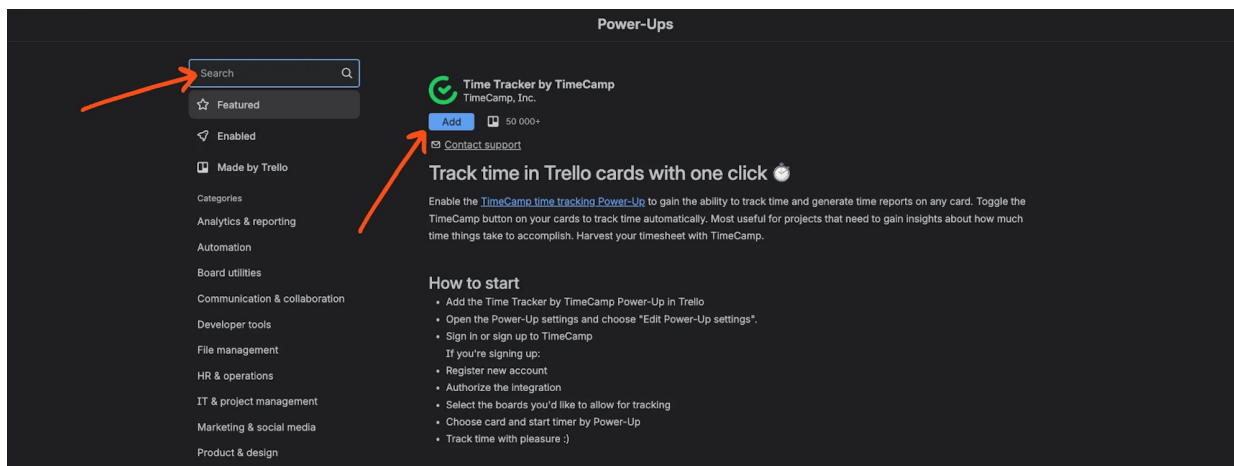

To work properly, **integration with Trello** must be enabled on your TimeCamp account first.

Add Trello Power-up

To enable the Power-up first please open a board in Trello and click the **Power-Ups menu icon** and next **Add Power-Ups**.

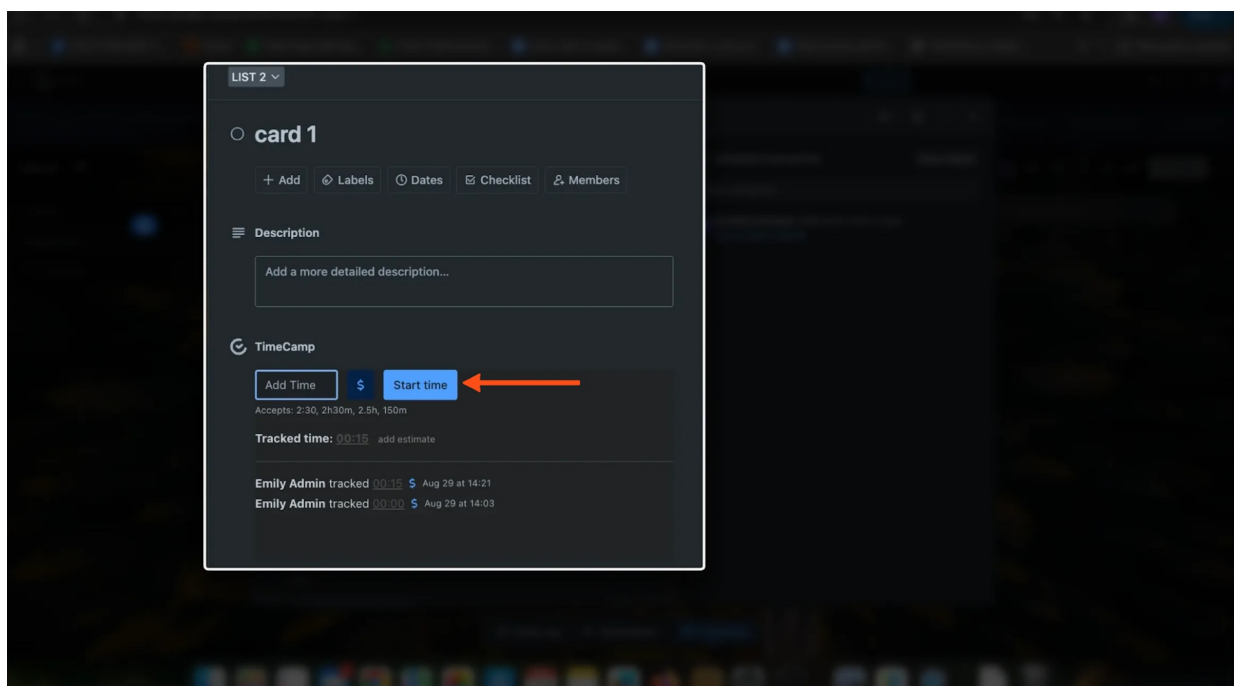

Find **Time Tracking by TimeCamp** power-up on the list and click the **Enable** button.

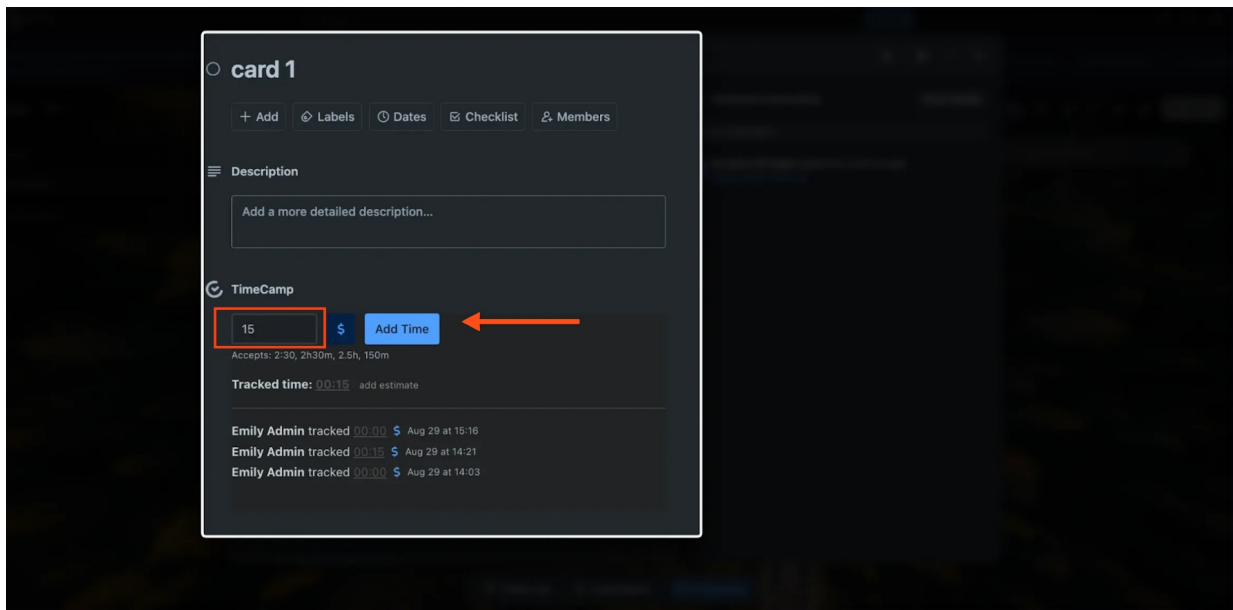

Repeat these steps for each board, where you'd like to enable the time-tracking feature. Power-up must be enabled on every board separately

Track time with Trello power-up

If you're not signed in to the power-up yet please use the credentials of your TimeCamp account. If you are already signed in, you can click the **Start timer** button to start a new timer and click the Stop timer to stop it:

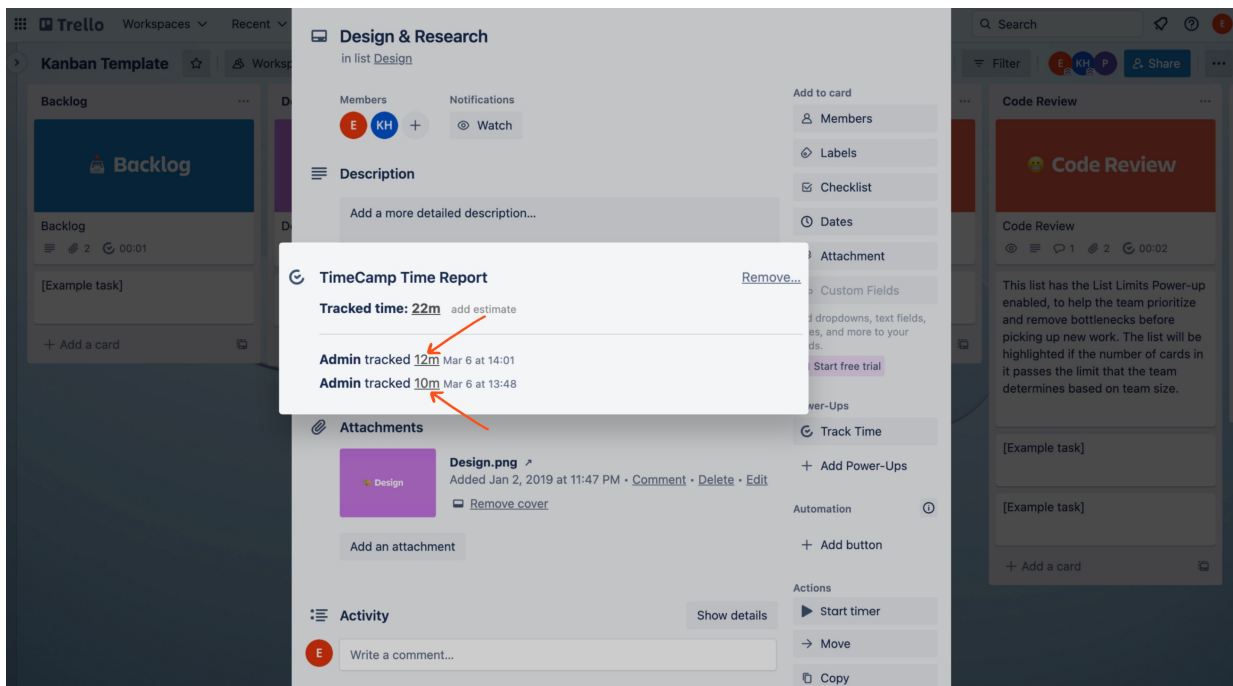

You can also put the number of hours in decimal format to add time manually and then click **Add Time**.

Modify tracked time

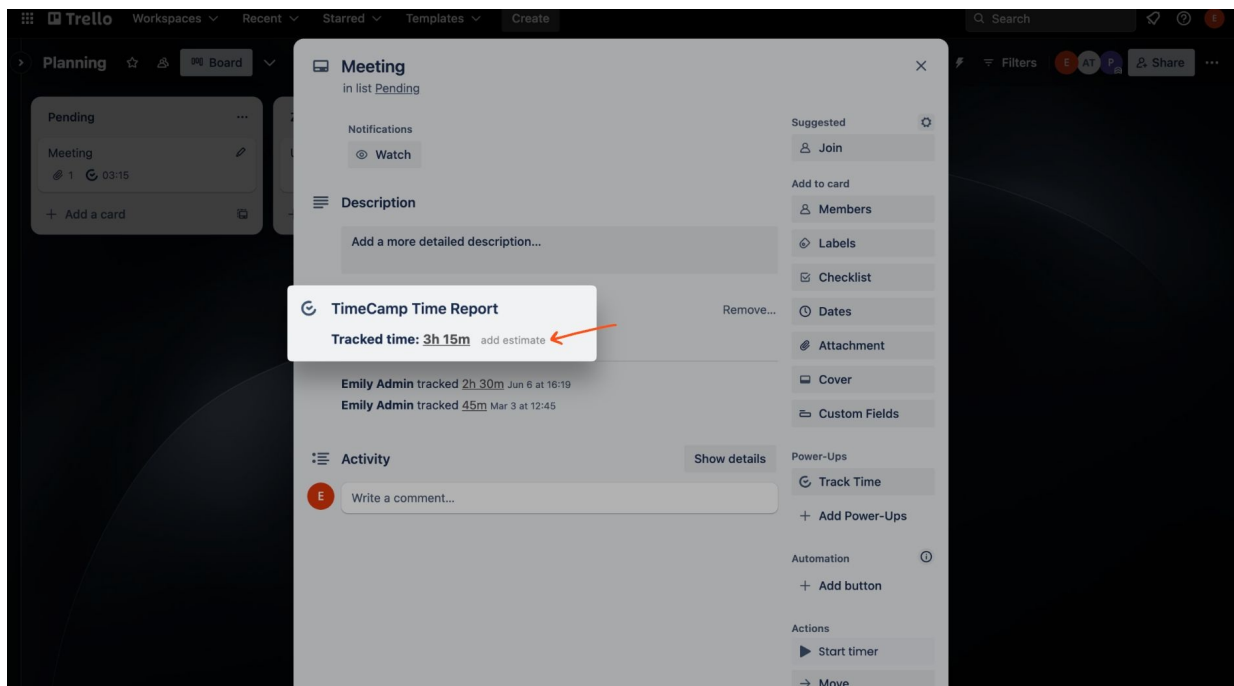

If you'd like to edit your tracked time please open the card, in which you would like to modify your time. Next, in the TimeCamp **Time Report** section find the time entry you would like to modify or delete and **click on its duration**. You'll be redirected to your web **Timesheet** where you can edit time entries.

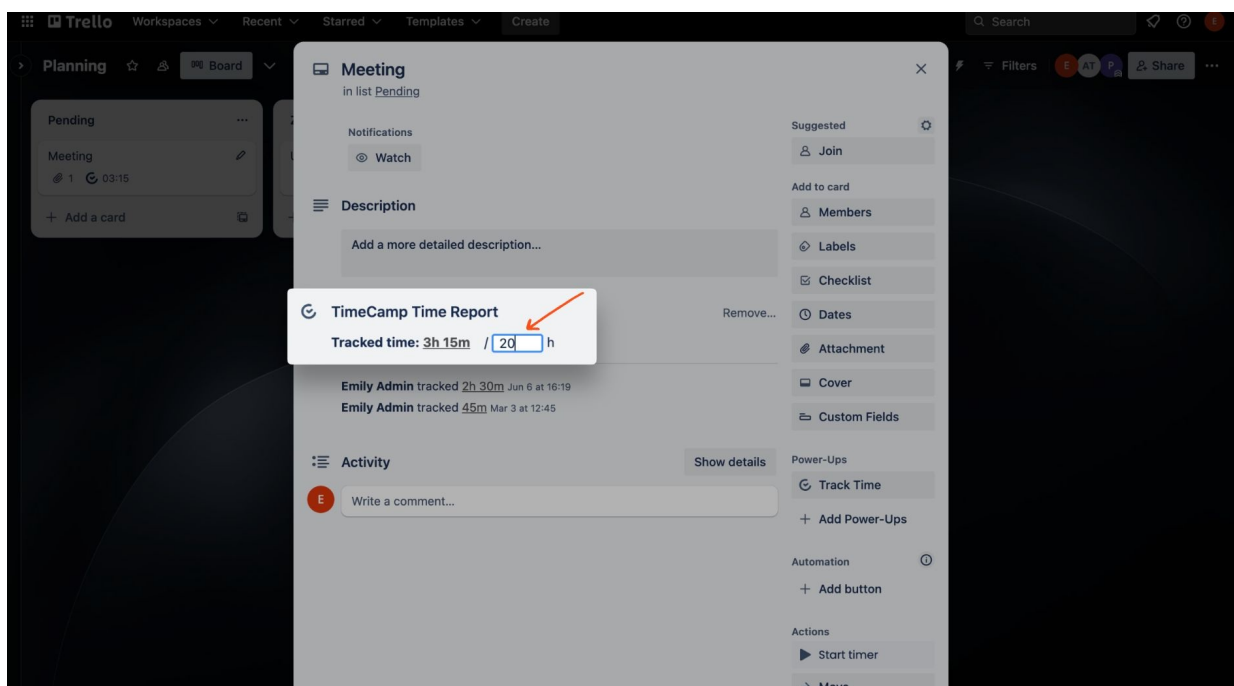

Add estimate

Under the TimeCamp Time Report section, you can find an option to **add estimate time**. This value will be automatically synced and imported as **Budget** to TimeCamp.

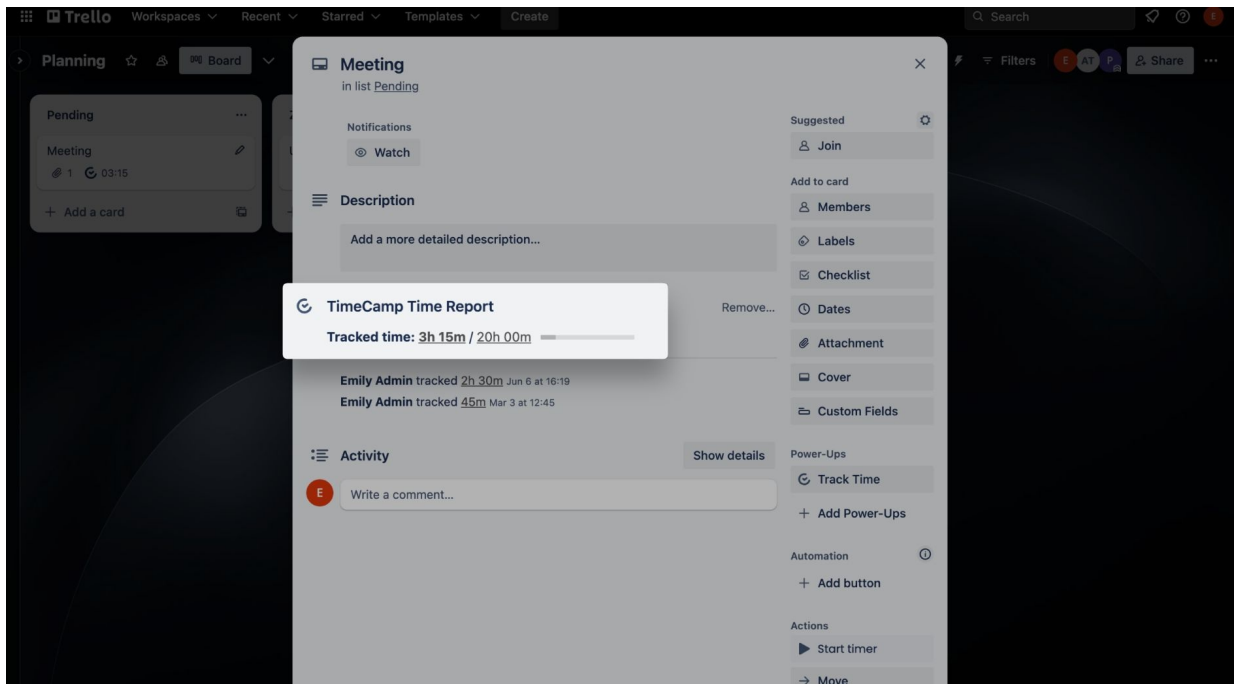

Click on the **Add estimate** option.

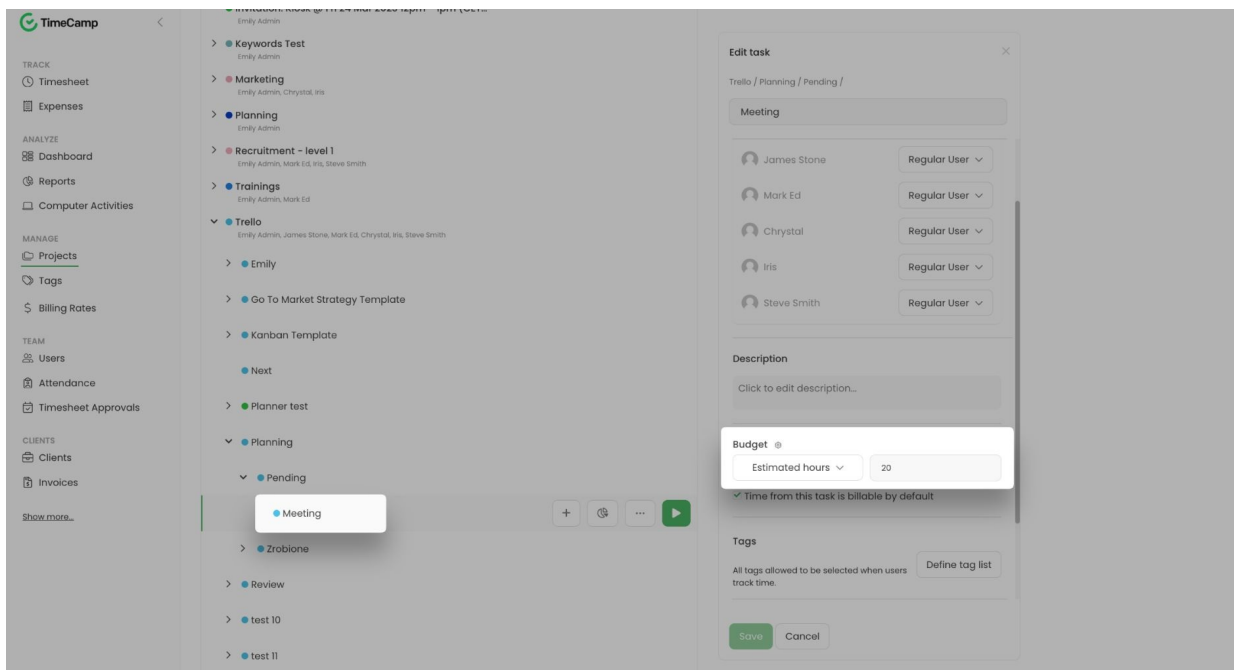

Next, input an **estimated hours value** for this task and click anywhere outside the field.

After adding estimates a small graph next to the tracked time will appear showing how many hours are already used.

Estimated hours will be automatically imported as task **Budget** to TimeCamp. It will allow you to generate Estimates reports on tracked time and used budget.

Learn more about Budgeting reports from this [article](#).

Sign out or relog to Trello power-up

To log out and relog to your TimeCamp account in power-up you should remove power-up settings first:

1. Log into your Trello account. Open the board and click the **Power-Ups** button above the lists of cards;
2. Find Time Tracker by TimeCamp on the list and click on its **Settings**;
3. Choose the **Remove personal settings** option from the menu;
4. Then confirm by clicking on the **Clear data** button;
5. Power-up should force you to log in again. If you have an open TimeCamp tab in your browser, power-up will immediately synchronize with the TimeCamp account you're currently logged into;
