Easy Redmine

In this article:

- [Overview](#)
- [Enable integration](#)
- [Track time on imported items](#)
- [Disable integration](#)

[Easy Redmine](#) is an online tool for project management and bug-tracking. It contains a calendar and Gantt charts that show the projects and their deadlines in a graphic way. Easy Redmine integration allows measuring the time consumption of each task. Moreover, it allows to invoice your customers accurately as TimeCamp imports all of your projects, tasks, and even project budget from Easy Redmine.

Overview

The integration will be enabled to the entire account, so **all users will be able to track time on imported tasks**. The integration will be connected to the Easy Redmine account of the person who enabled the integration.

Projects will be imported as tasks under the Redmine project. Lists with their tasks will be imported as subtasks under the tasks (projects) in TimeCamp.

We don't provide an option to select items that should or should not be imported from Easy Redmine to TimeCamp. After the integration is enabled all projects, lists, and tasks the owner of integration has access to, will be imported to the Projects module in TimeCamp.

It is not possible to edit the structure of imported items in TimeCamp.

As an integration creator, you automatically gain access to all imported items. **Other users are assigned automatically based on their email addresses, which need to match in both TimeCamp and Easy Redmine.** You can always assign tasks manually as well. If users are assigned to the main project Easy Redmine they will be able to track time to all tasks under the Easy Redmine project structure. If users are assigned only to certain tasks, they will be able to track time only to these tasks and subtasks under the tasks' structure.

If you enable the **exporting option** in integration settings, tracked time will be automatically exported to your Easy Redmine account. Just open a task and navigate to the **Spent Time** tab.

Please keep in mind that the **email addresses** and **account names** of your employees should match both in TimeCamp and Easy redmine. Otherwise, tracked time won't be exported.

Tasks and projects marked as completed or deleted in Easy Redmine will be automatically moved to the list of Archived tasks in TimeCamp. If you create a new item in Easy Redmine it will be automatically imported to TimeCamp within 1 hour. To immediately synchronize the integration and update newly added items use the "Force synchronization" option on TimeCamp web Timesheet. Sync will be executed within a few seconds.

The screenshot shows the TimeCamp Timesheet interface. At the top right, there is a user icon with a red arrow pointing to it. Below the user icon are several buttons: 'Day' (highlighted in green), 'Week', 'Calendar', 'Bulk edit' (with a red circle around it), and a more options menu. The main area shows a timeline from 10:00 to 23:00. A 'Working day' button is selected. A central message says 'No recent time entries' and 'Seems like you haven't tracked any time yet'. At the bottom are buttons for '+', 'Submit for approval', and 'Show more days'.

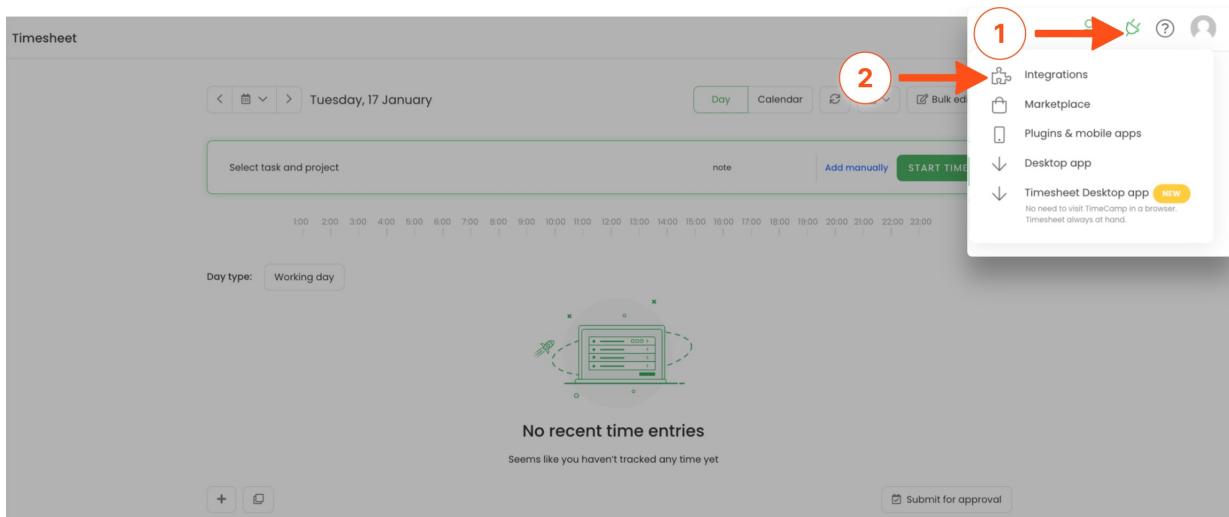

If the user who enabled the integration is not a part of your account anymore, we recommend reenabling the integration.

Enable integration

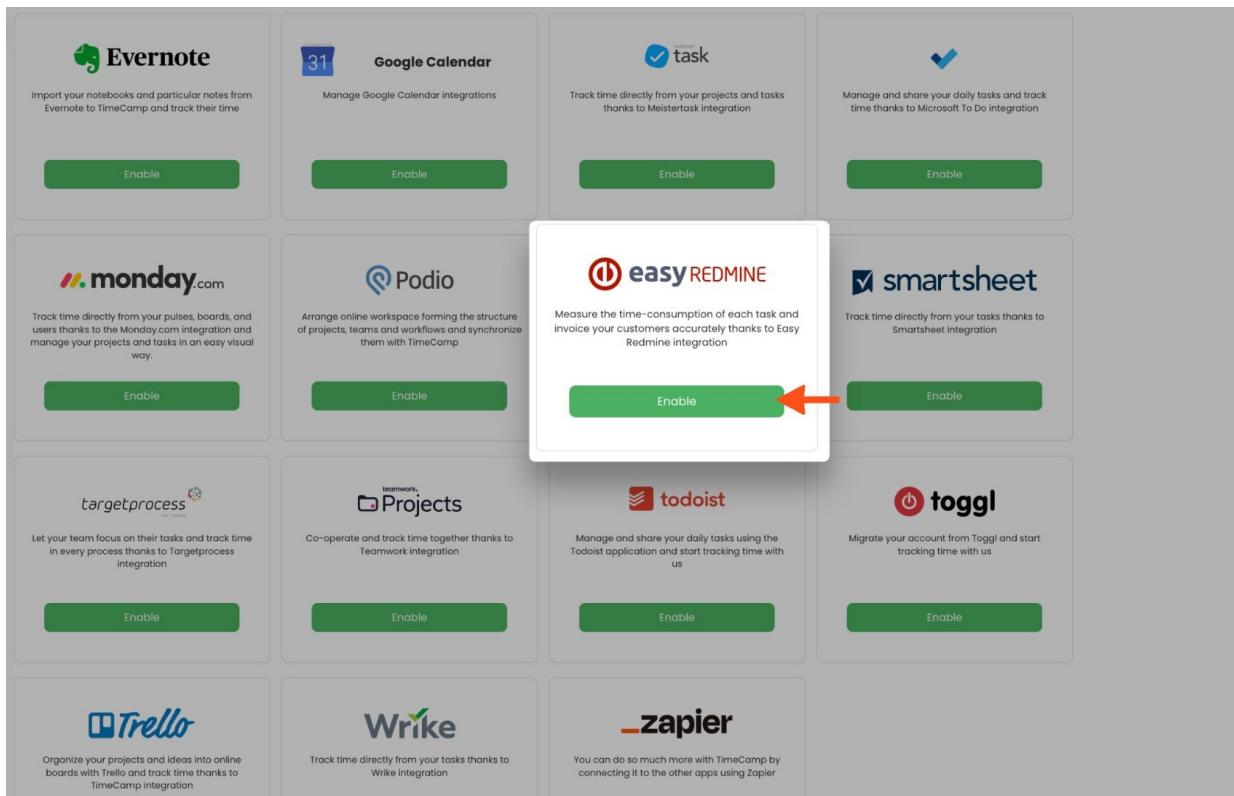

Only the Administrator of the account can enable the integration.

Step 1

To enable the Easy Redmine integration, please navigate to the plugin icon and select the **Integrations** option. Next, find the **Easy Redmine** integration on the list and click the **Enable** button.

The screenshot shows the TimeCamp Timesheet interface. A red arrow labeled '1' points to the 'Integrations' icon in the top right corner. A red arrow labeled '2' points to the 'Bulk edit' button. A dropdown menu is open, listing 'Integrations' (highlighted with a red circle), 'Marketplace', 'Plugins & mobile apps', 'Desktop app', and 'Timesheet Desktop app' (marked as 'NEW'). The 'Timesheet Desktop app' entry includes a note: 'No need to visit TimeCamp in a browser. Timesheet always at hand.'

Step 2

Next, enter your **Easy Redmine URL address**. We'll need the entire address, along with 'https://' prefix.

Settings

Easy Redmine Integration

Measure the time-consumption of each task and invoice your customers accurately thanks to Easy Redmine integration.

- ✓ Import all of your projects, tasks and projects budget from Easy Redmine
- ✓ Track working time to help creating accurate invoices for your customers
- ✓ Estimate profitability of your projects

How to integrate?

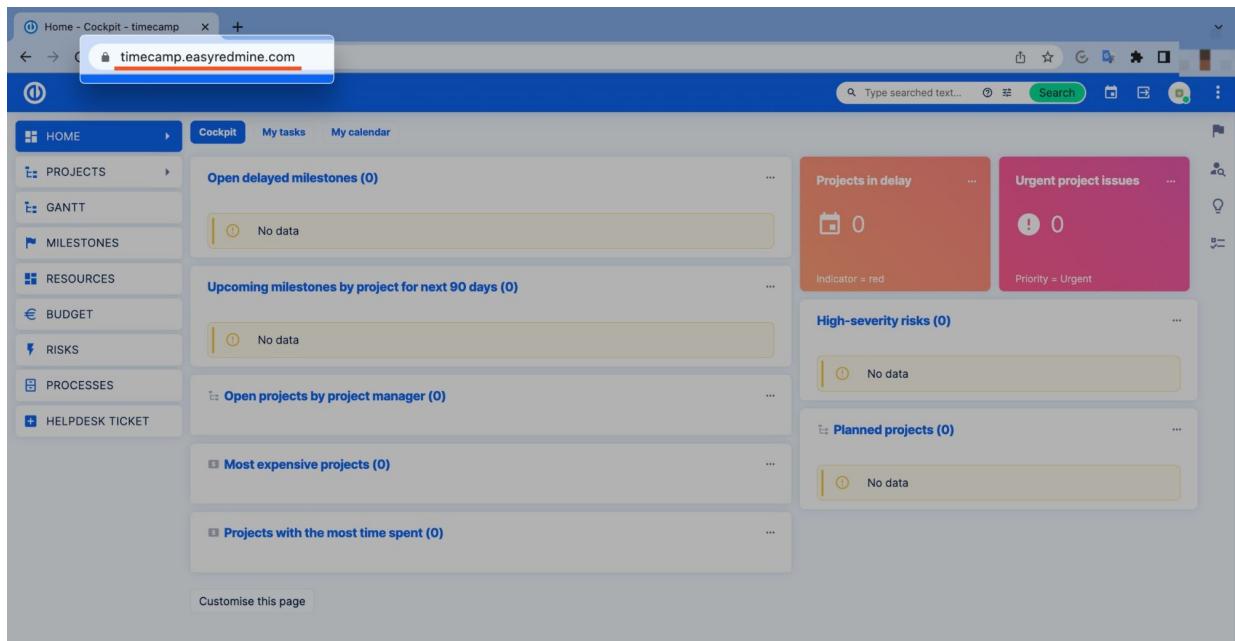

1. Enter your Easy Redmine's URL and API Token in the fields below (you can find it in `/my/account`)
2. Click "Enable integration" to connect TimeCamp to Easy Redmine
3. For more information on how to enable the integration please visit our [Help Center](#)

Enable integration

The screenshot shows the TimeCamp Cockpit interface on a web browser. The URL in the address bar is `timecamp.easyredmine.com`. The main dashboard is titled "Cockpit" and includes sections for "PROJECTS", "GANTT", "MILESTONES", "RESOURCES", "BUDGET", "RISKS", "PROCESSES", and "HELPDESK TICKET". Key metrics displayed include "Open delayed milestones (0)", "Upcoming milestones by project for next 90 days (0)", "Open projects by project manager (0)", "Most expensive projects (0)", "Projects with the most time spent (0)", "Projects in delay (0)", and "Urgent project issues (0)". A "Customise this page" button is located at the bottom left of the dashboard area.

Step 3

The next step is adding the **API token** from your Easy Redmine account. To get the API token, click on your avatar in the right-upper corner and click on the **Edit** button. Scroll down to the Preferences section and copy your **API Key**.

The screenshot shows the "Settings" page for the "Easy Redmine Integration" feature. The "Easy Redmine Integration" section is described as measuring time-consumption of each task and invoicing customers accurately. It lists three integration features: "Import all of your projects, tasks and projects budget from Easy Redmine", "Track working time to help creating accurate invoices for your customers", and "Estimate profitability of your projects". The "How to integrate?" section provides instructions: 1. Enter your Easy Redmine's URL and API Token in the fields below (you can find it in `/my/account`), 2. Click "Enable integration" to connect TimeCamp to Easy Redmine, and 3. For more information on how to enable the integration please visit our [Help Center](#). The "URL:" field contains `https://timecamp.easyredmine.com`. The "Token:" field contains the API token: `5bbd278be67ld8fla2e85fl56b4a4f47c`. A checkbox labeled "Upload timesheet entries to Easy Redmine" is checked. A green "Enable integration" button is at the bottom.

Re-enable integration **Unlink integration**

Your Projects and Tasks will be imported to the Projects module in TimeCamp. All imported items will be accessible for you to track time using TimeCamp's **timesheets**, mobile, desktop application, or browser plugin.

Track time on imported items

There are a few ways of **tracking time** in TimeCamp. After the integration is created and all your tasks are imported, you can simply select the desired task from the list and start your timer. Below you can find examples

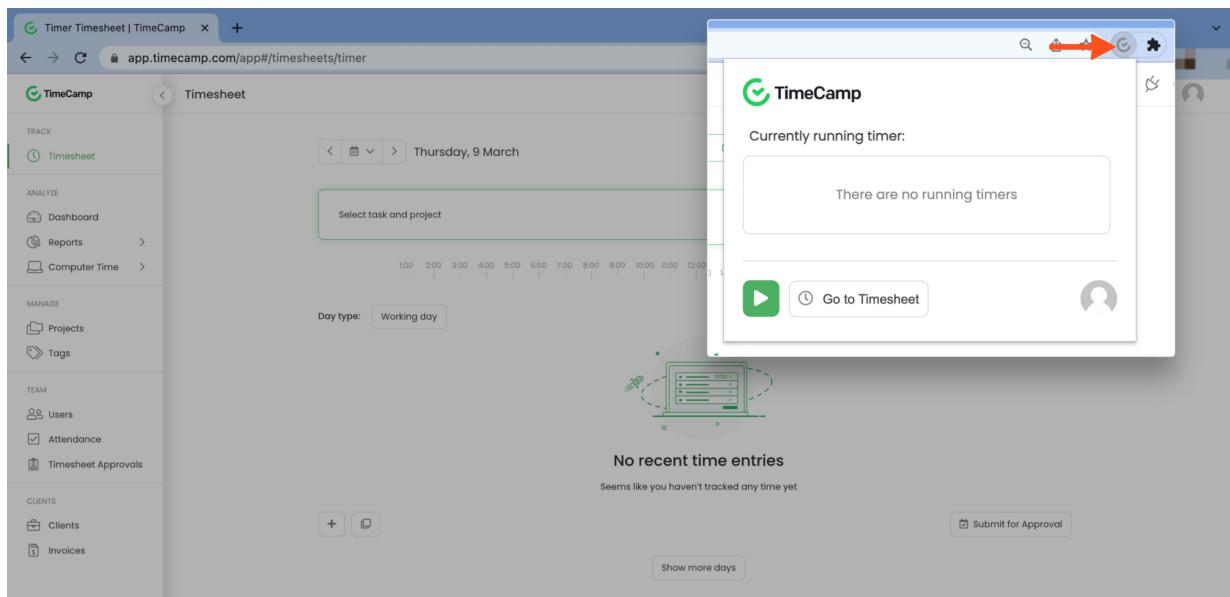

of all available ways of tracking time.

Web Timesheet. Simply select a task using a search box or the drop-down list and run the timer.[Learn more](#)

Desktop app. Click on the “No task” option in a task widget or use the option “Start a task” from the desktop app menu and use a search box or the drop-down list to find the target task. The task widget will be automatically synchronized with your web Timesheet. [Learn more](#)

Mobile app. Go to your Timesheet in the mobile app and click on the “Add” button if you want to create an entry manually or on the “Start” button if you prefer to track time in real time. Next use a search box or the drop-down list to find the target task and start tracking. [Learn more](#)

Browser plugin. If you installed the browser plugin and logged in to your TimeCamp account, just click on the plugin icon next to the URL address. Start the timer and select task without leaving the website you’re working on. When you finished tracking just click on the red “Stop tracking” button. The browser plugin will be automatically synchronized with your web Timesheet. [Learn more](#)

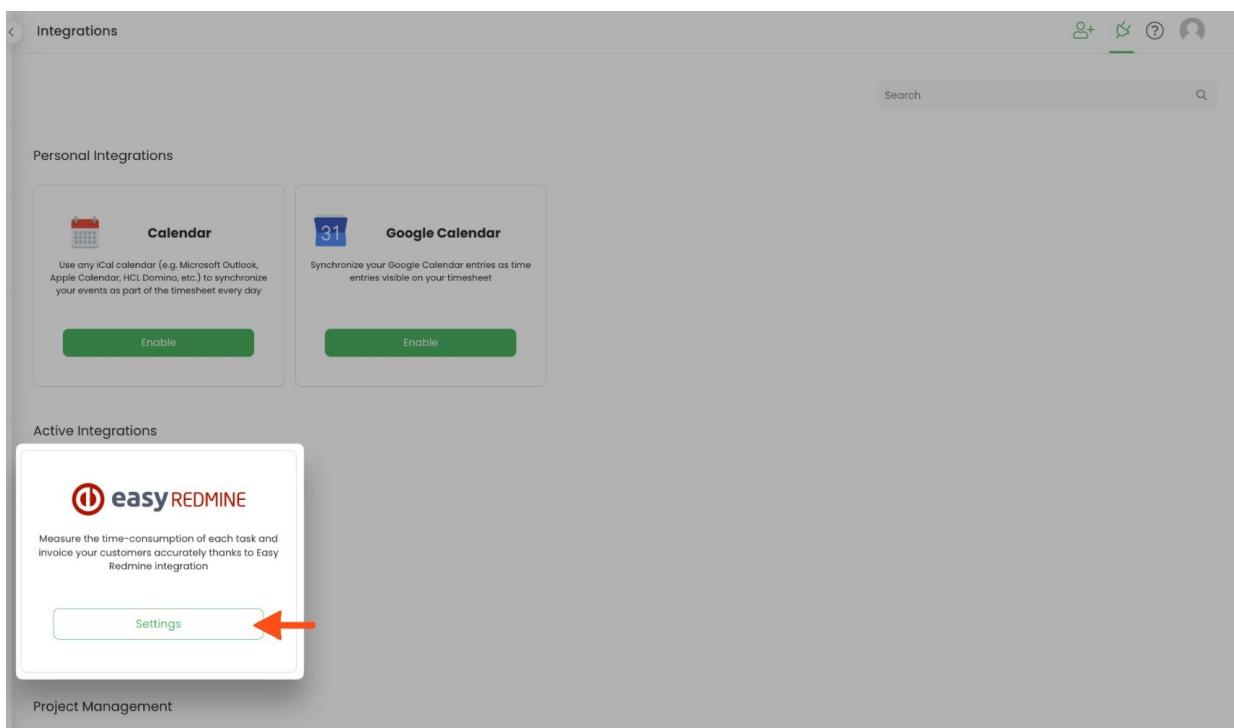

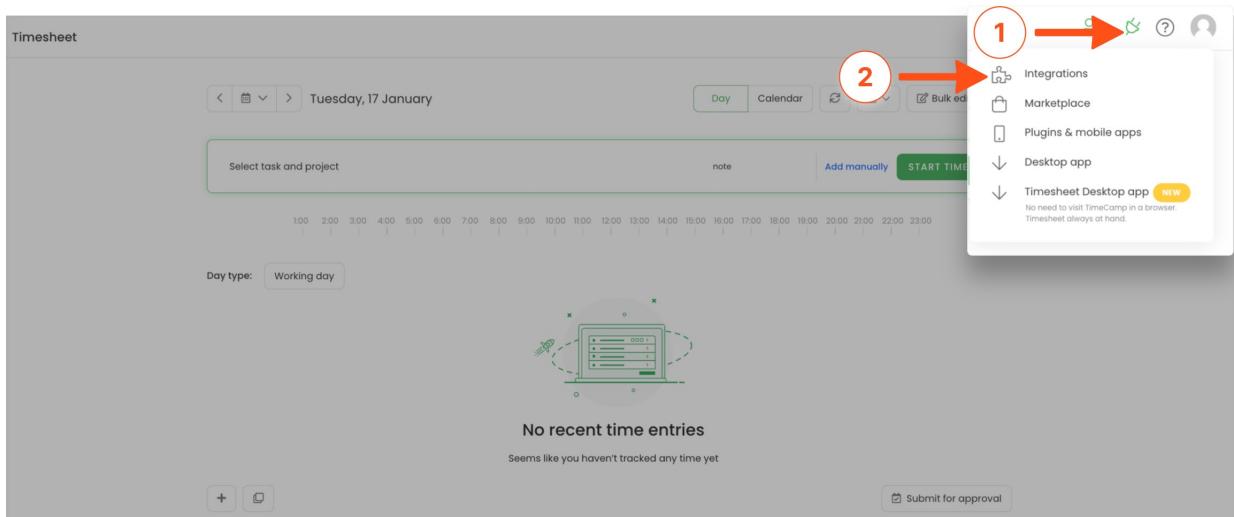

Disable integration

Only the Administrator of the account can unlink or re-enable the integration.

Step 1

If for some reason you would like to reenable or unlink the integration please navigate to the plugin icon and select the **Integrations** option. Next, find the **Easy Redmine** integration on the list of active integrations and click on its **Settings**.

Step 2

Next, to unlink the integration simply click on the **Unlink integration** button.
