The full list of +100 plugin integrations

Below you will find the list of platforms that are supported by our [Chrome Plugin](#) and [Microsoft Edge Plugin](#).

We don't provide full integrations with these platforms, they are only supported by a plugin.

After you install the browser plugin a **start timer button** will be added next to your tasks/items on the supported website. You can click the start timer button and assign a task to your time. The name of the item you're currently working on will be automatically added as a note.

Airtable	Fogbugz	Nela	Sourcelair
AxoSoft	Freedcamp	Newsletter2go	Spidergap
