Day timesheet

In this article:

- [Start timer](#)
- [Add time entry](#)
- [Timesheet options](#)

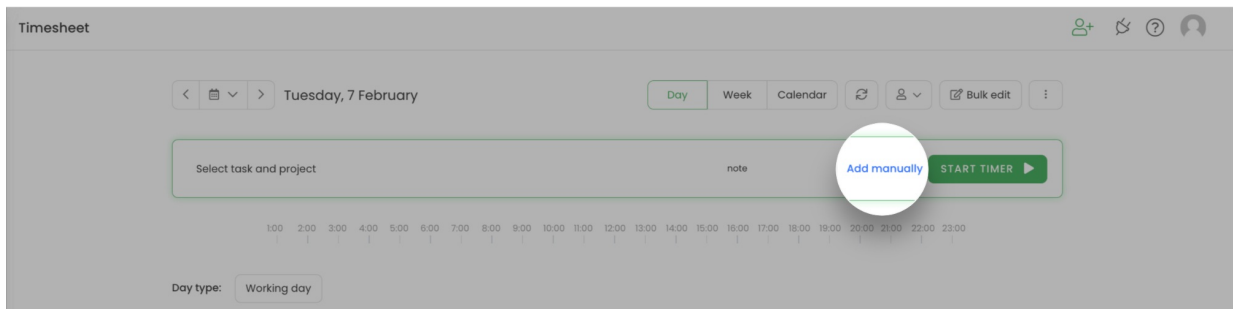

Timesheet is one of the main sections in TimeCamp where you can track time to your projects, create and edit time entries and optionally add notes or tags for better categorizing. We prepared 3 types of timesheets: day, week, and calendar.

Timesheet is available for all subscription plans and all account roles.

Day timesheet is a textual version where you can find detailed information about time entries.

The screenshot shows the 'Timesheet' interface for Wednesday, 6 July. At the top, there are navigation icons and a user profile icon. Below that, a date selector shows 'Wednesday, 6 July' with a 'Return to Today' link. A view selector shows 'Day' selected, along with 'Week' and 'Calendar' options. A toolbar includes a refresh icon, a user icon, a 'Bulk edit' button, and a menu icon. A search bar for 'Select task and project' is present, with a 'note' field, a time range of '17:02 - 17:02', and a duration of '0:00:00'. A 'Start timer' button and an 'ADD TIME ENTRY' button are also visible. A horizontal timeline from 1:00 to 23:00 is shown. Below the timeline, the 'Day type' is set to 'Working day'. Three time entries are listed: 'CS Onboarding' (Trainings, Activity: demo) from 08:00 to 12:15 (4:15:00); 'Revenues' (Finances / Bookkeeping, Activity: add a tag) from 13:00 to 15:45 (2:45:00); and 'Meeting' (Marketing, Activity: SEO) from 15:45 to 17:15 (1:30:00). A 'Submit for Approval' button is at the bottom right, and a 'Show more days' button is at the bottom center.

Day view allows **tracking time in real time** as well as **manually adding time entries**. To switch between these two methods click on the **Start timer/ Add manually** blue link:

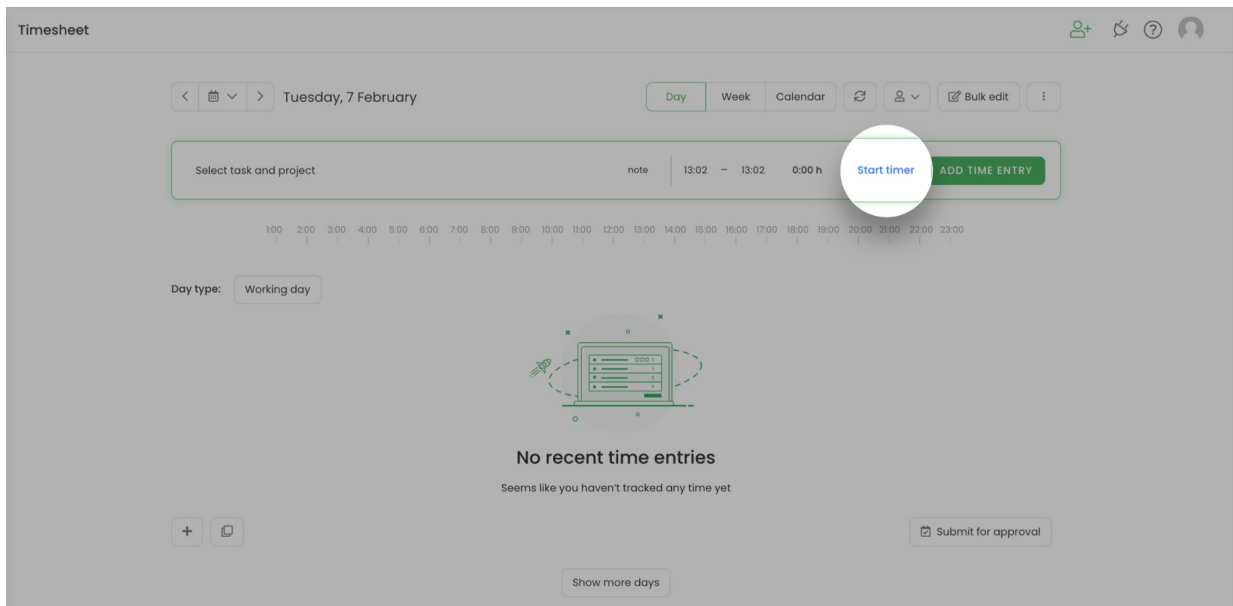

If you'd like to hide or keep only the Day on your Timesheet please navigate to the [Time Tracking settings](#) and edit the **Timesheet view** options. Changes will be applied to all users on your account.

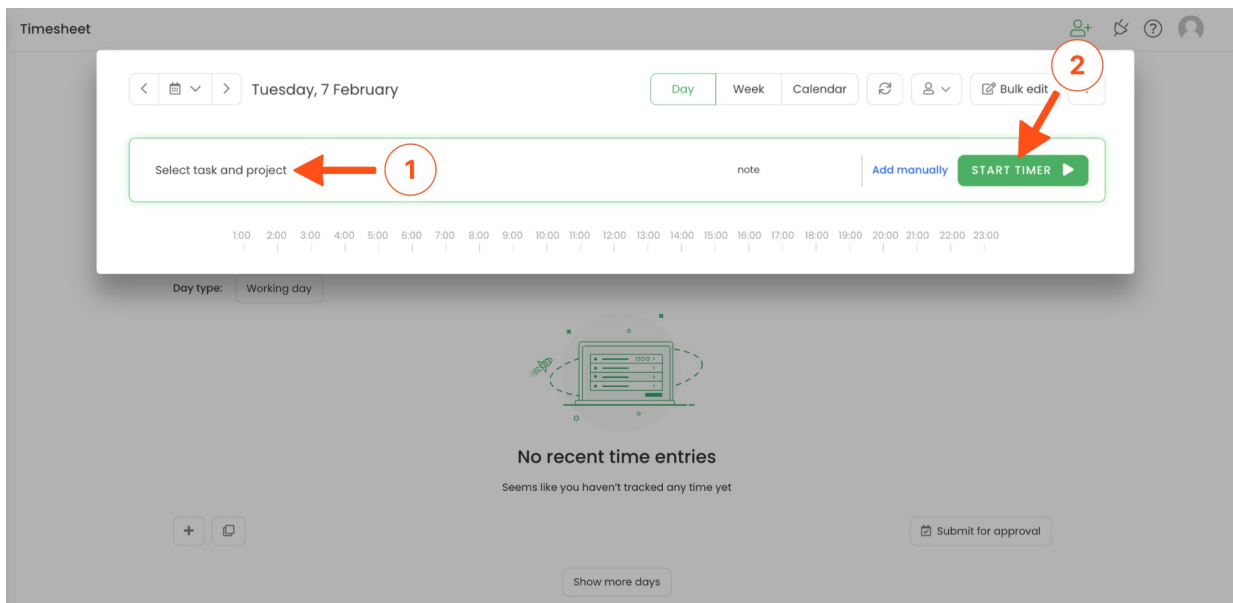

Start timer

Please keep in mind that real-time tracking is possible only for the **current day**. If you would like to add time to the past or future days you can do it only manually.

To track time in real-time change the view to the timer. To do it, simply click the **“Start timer”** link next to the green button.

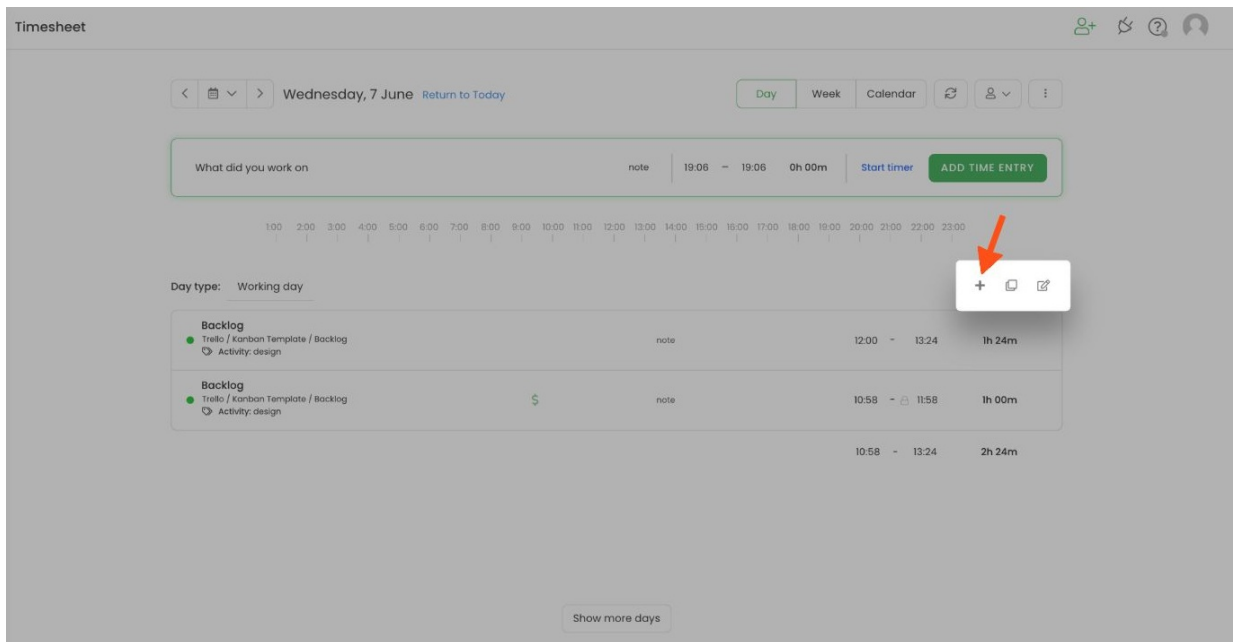

Next, **select a task** and **start timer** with a single click. It is possible to have only 1 running timer and only 1 task assigned at once.

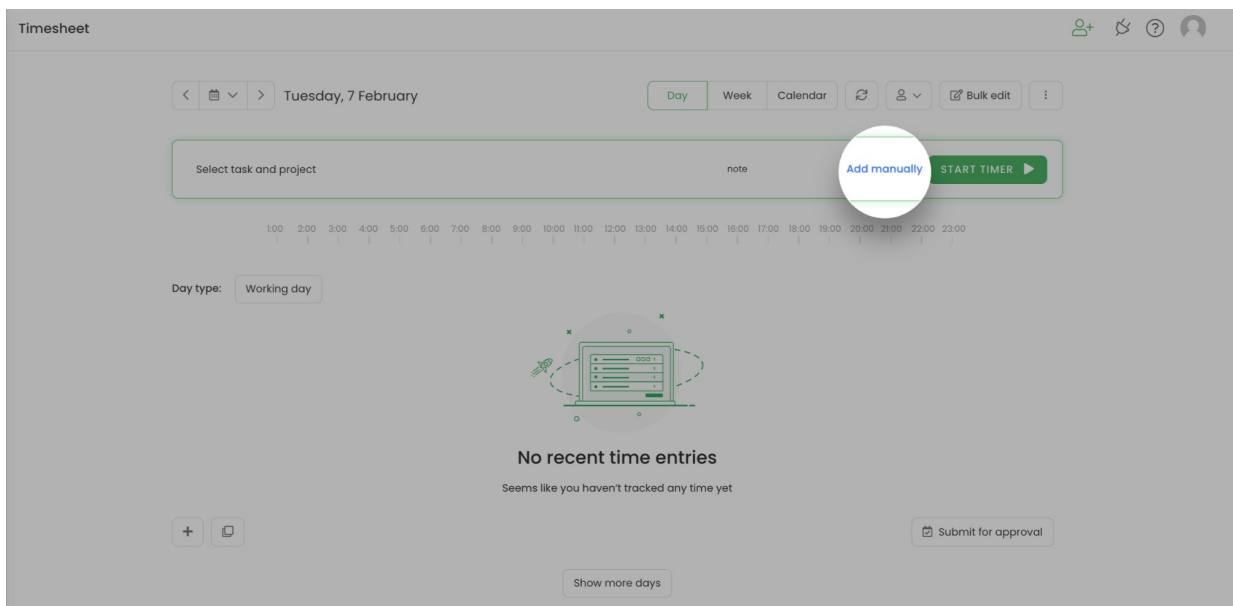

After you finished working on a task, don't forget to stop the timer. Closing a web application or turning off your computer won't stop the running timer.

The additional option to add time entry is to click on a **plus icon** in the right corner. After you click on this button a time entry will be immediately created so you can click on the start button next to it and assign a task.

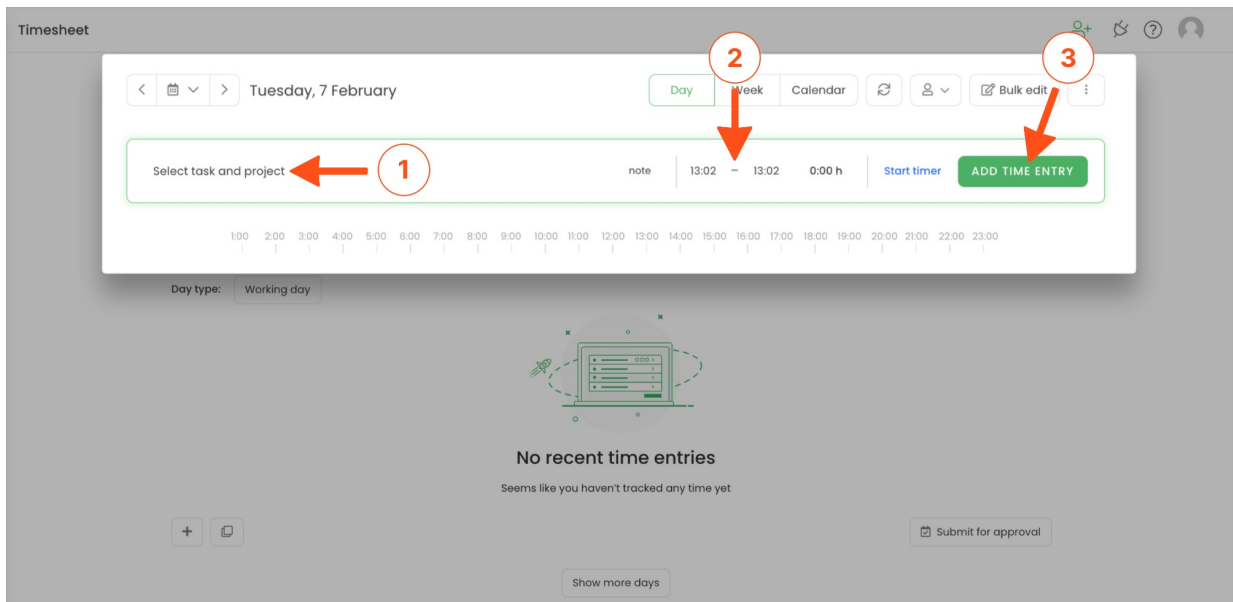

Add time entry

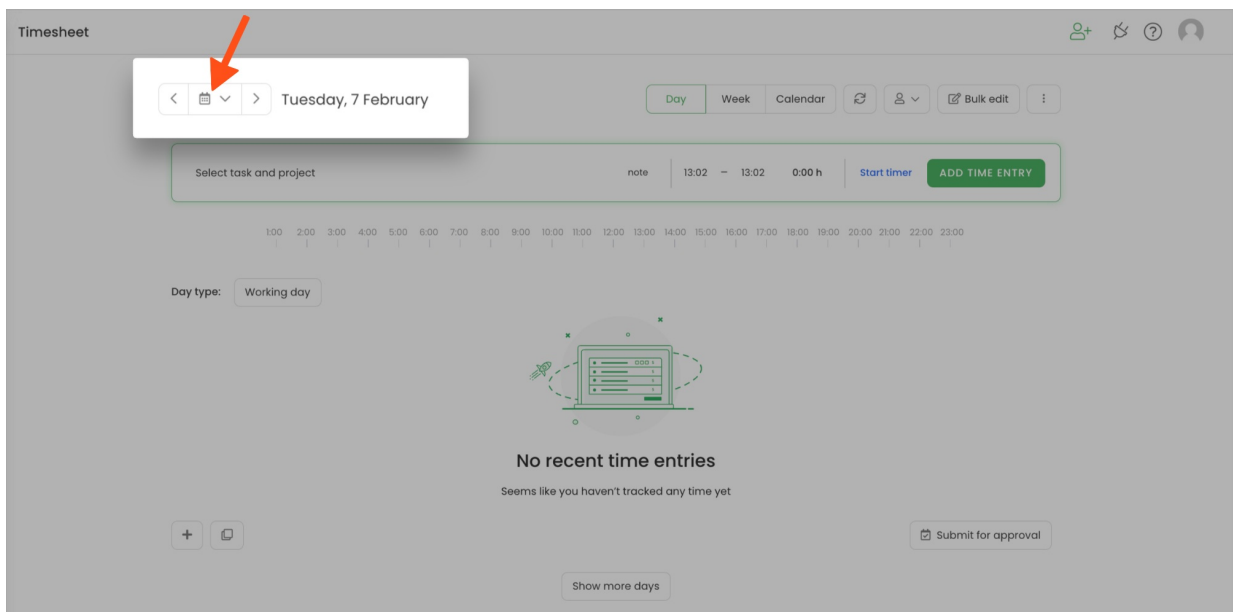

To manually add time entries change the view to the manual mode. To do it, simply click the “Add manually” link next to the green button.

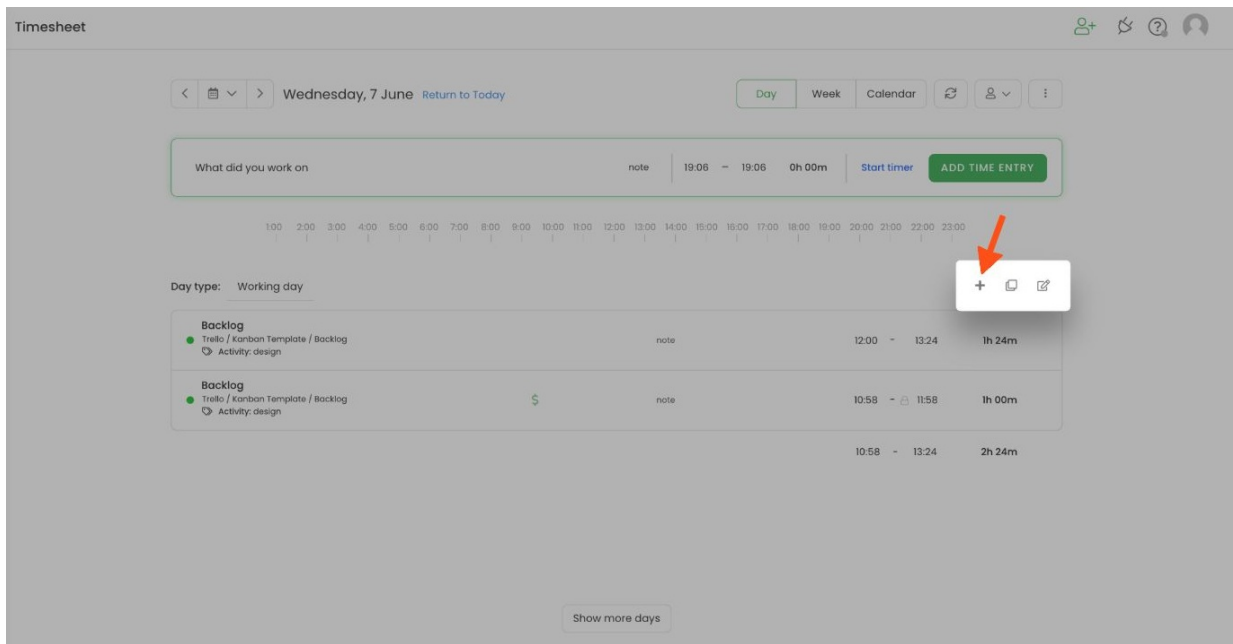

To create a new time entry you need to fill up the top bar and add time. **Select the task** you'd like to add time to. Next, **enter 'from' - 'to' time values** (or define the duration time) and click on the green button **Add time entry**.

If you would like to fill in your Timesheet for the past or future days, use the **Date range** filter to select the day you'd like to edit.

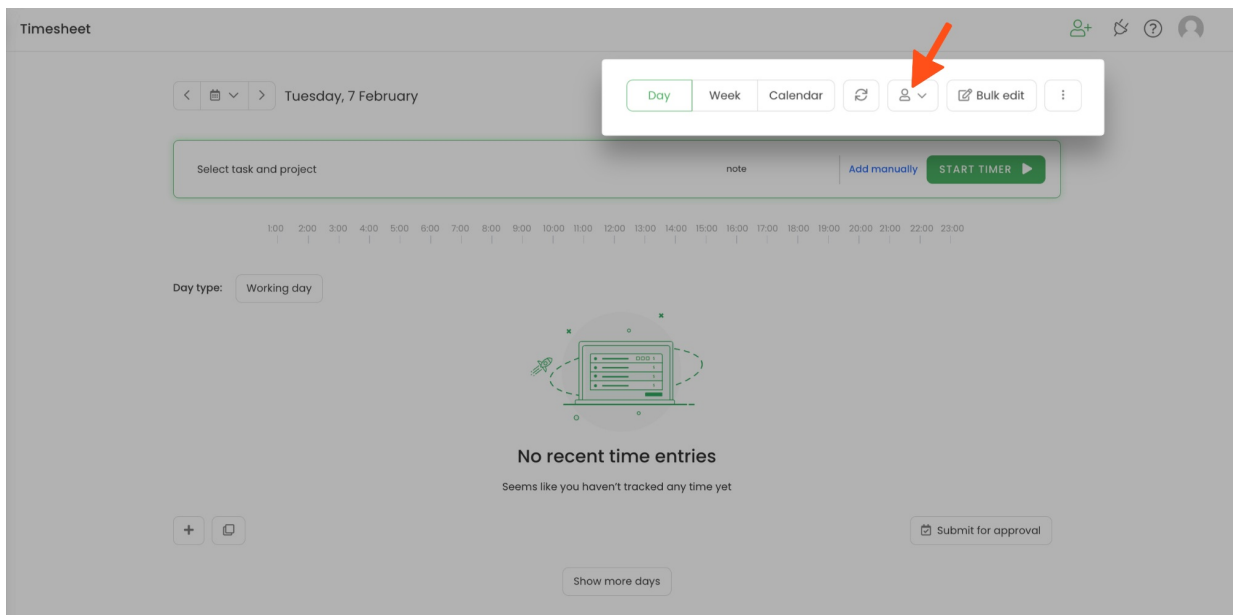

The additional option to add time entry is to click on a **plus icon** in the right corner of your Day Timesheet. After you click on this button a time entry will be immediately created so you can modify its timeframes and assign a task.

Timesheet options

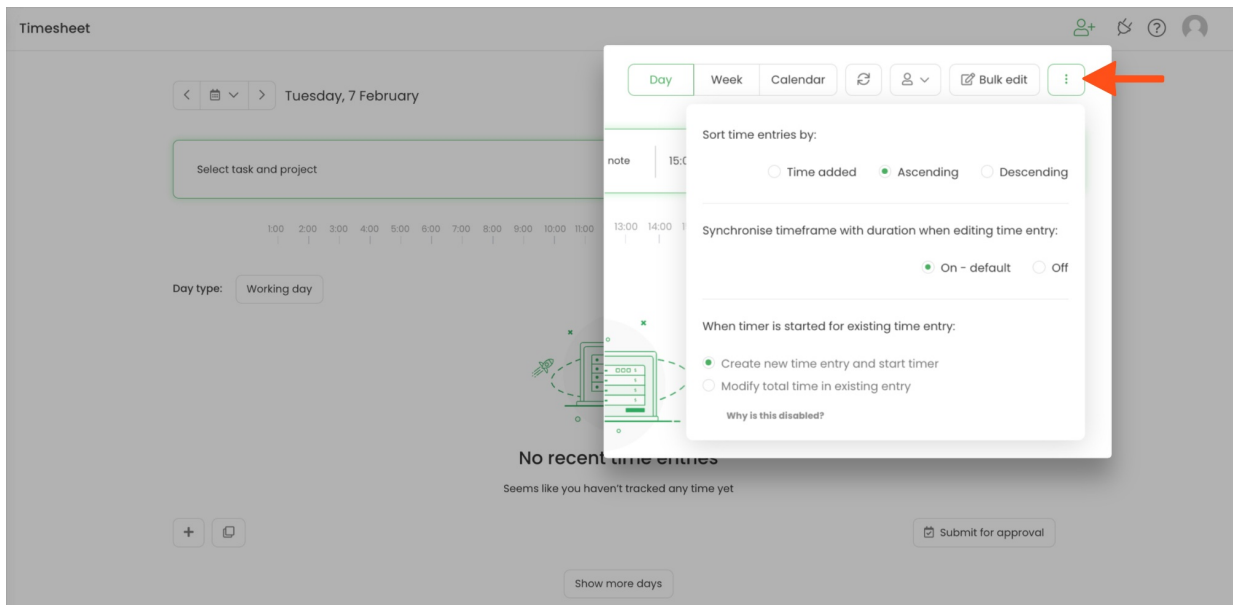

Day timesheet contains a few additional functionalities which will help to manage time entries.

On the top part, the Administrator of account has access to the **People picker**, which allows to choose a user from their team and view their Timesheet. Time Tracking Administrator also has the ability to edit other users' timesheets.

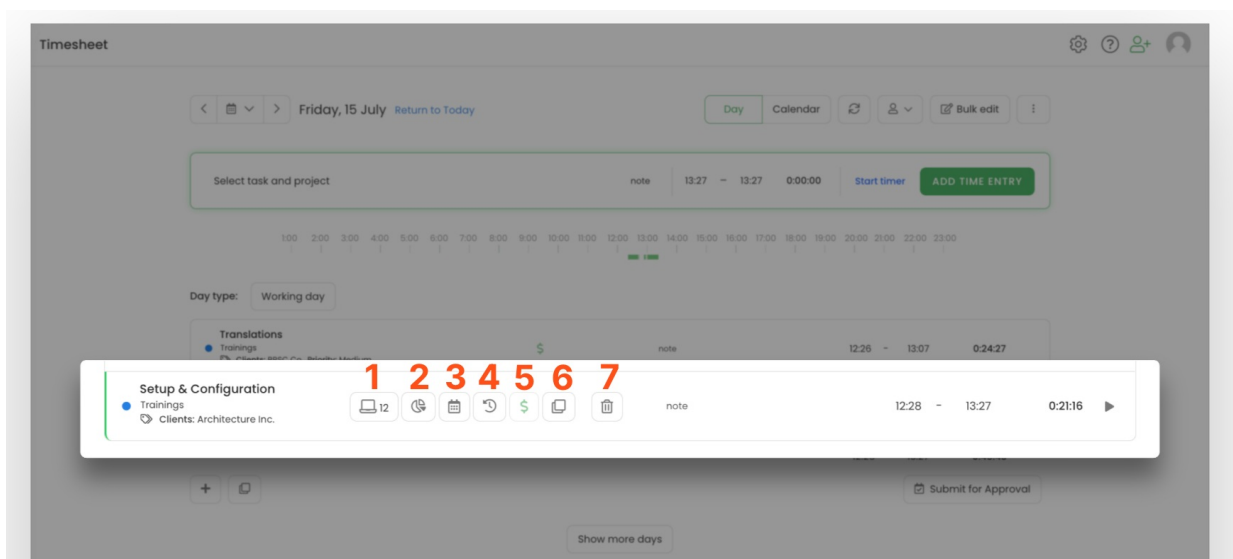

[Here](#) you can learn more about account roles and permissions.

On the right-hand side under the “3 vertical dots” button, you can find some important settings. One of them is **Synchronise timeframe with duration when editing time entries**. If this option is turned on the start, end, and duration time will be automatically adjusted to match each other while editing time entries. [Learn more](#)

Once your timesheet is filled up you can hover your mouse over a specific entry and find some additional options:

1. Shows computer activities assigned to this entry (only if you use the TimeCamp desktop app). [Learn more](#)
2. Shows the report to all-time tracked on this task. [Learn more](#)
3. Changes the date of this entry.
4. Opens time entry history. [Learn more](#)
5. Makes the entry billable/non-billable. Handy if you want to invoice tracked time later.

6. Clone time entry within a selected day.

7. Delete a selected time entry.

Once an entry is deleted the action can't be undone and data can't be restored. To recreate the deleted time entry check the [history of your Timesheet](#).

You can also **edit timeframes, change assigned tasks, add tags and notes to your entries at any time.** To change a task, simply click on it on your time entry and select a different one from the list.

[Here](#) you can learn more about editing, copying, and moving time entries.

As you've already noticed for those who use [the desktop application](#) there is additional functionality to **review registered computer activities** under the time entry. You will also find a **green timeline** on the Timesheet which shows the time you were working on the computer:

The screenshot displays the Timesheet application interface for Monday, 14 November. At the top, there are navigation controls and a 'Return to Today' button. Below this, a time entry for 'Optymalizacja Knowledge Base' is shown with a 'note' tag and a duration of 0:12:27. A red 'STOP TIMER' button is visible. A green timeline is overlaid on the interface, showing activity from approximately 9:00 to 17:00. Below the timeline, the 'Day type' is set to 'Remote work'. A list of activities is displayed, including '[SUP] Support' (08:42 - 13:13, 4h 30m), 'Google Calendar Events' (13:00 - 13:45, 0h 45m), and another '[SUP] Support' entry (14:00 - 16:44, 2h 44m). A summary row shows '(unassigned computer activities)' from 11:42 to 16:47, totaling 0h 23m. At the bottom, there are buttons for '+', a clipboard icon, and 'Submit for approval', along with a 'Show more days' button.
