iCal (Calendar) examples

In this article:

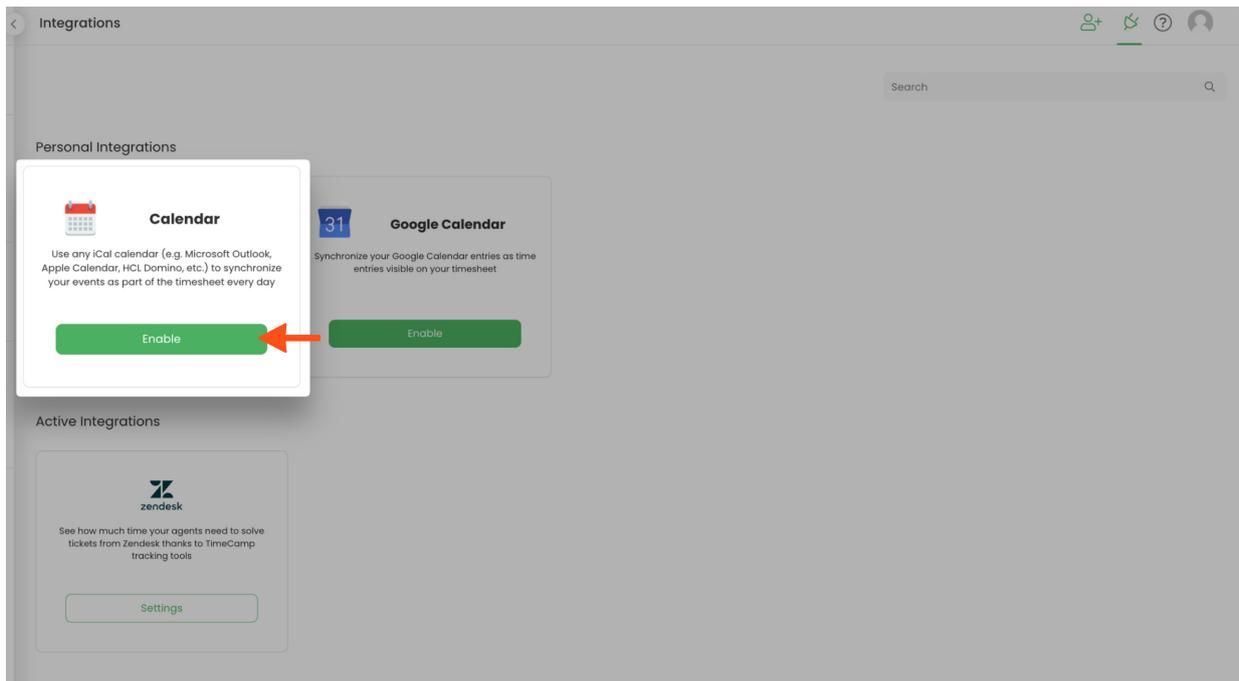

- [Apple iCloud Calendar](#)
- [Zoho Calendar](#)

Calendar integration requires an **iCal link** to connect and import events from your calendar. You can find this link in your calendar app settings. We prepared a few instructions for the most popular calendar apps.

To enable the Calendar integration, select the **Integrations** option in the left panel. Next, find the **Calendar** integration on the list and click the **Enable** button.

The screenshot shows the TimeCamp web interface. On the left, a sidebar menu lists various features, with 'Integrations' highlighted by a red arrow. The main area is titled 'Integrations' and is divided into sections: 'Personal integrations' and 'Active Integrations'. Under 'Personal integrations', there are three cards for 'Calendar', 'Google Calendar', and 'Outlook Calendar', each with an 'Enable' button. Under 'Active Integrations', there are three cards for 'asana', 'easyREDMINE', and 'Trello', each with a 'Settings' button. The top right of the interface includes a search bar and user profile options.

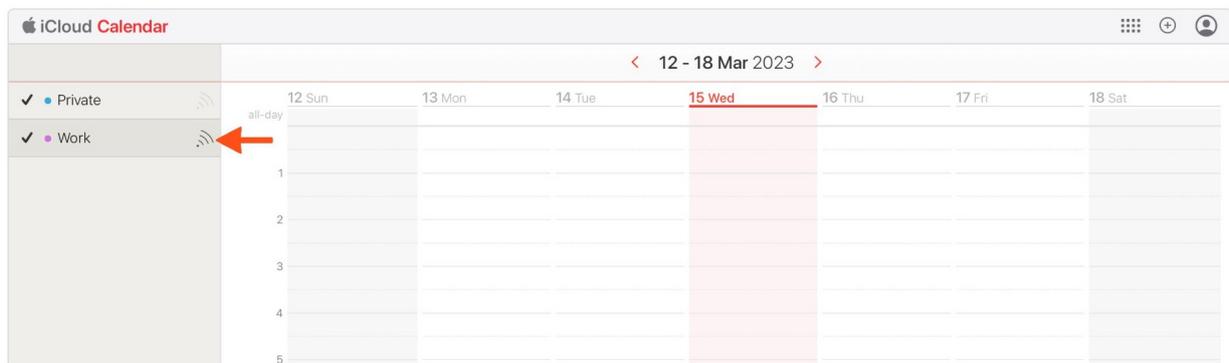

Learn how to integrate Google Calendar [here](#).

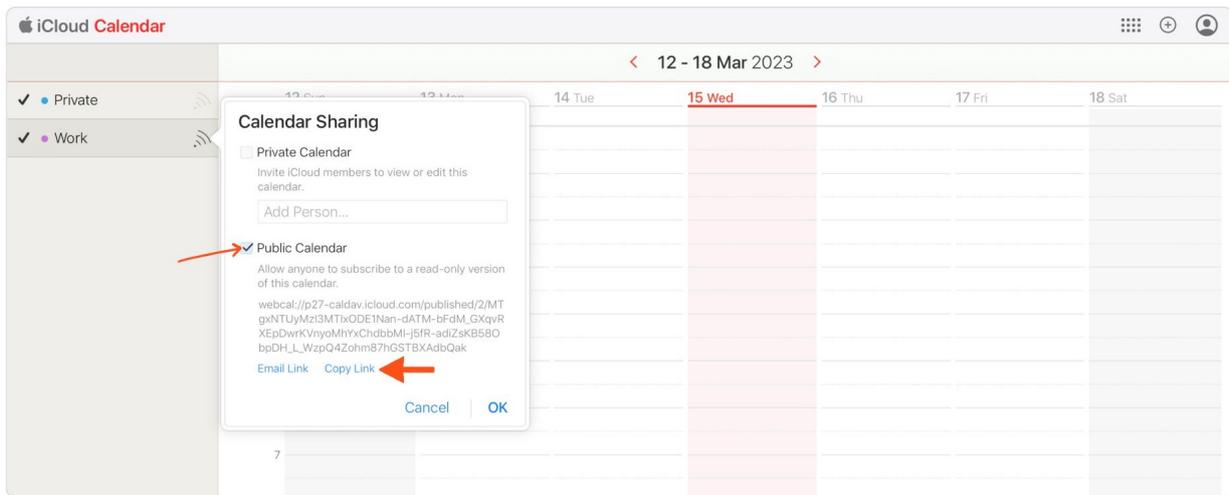

Learn how to integrate Outlook Calendar [here](#).

Apple iCloud Calendar

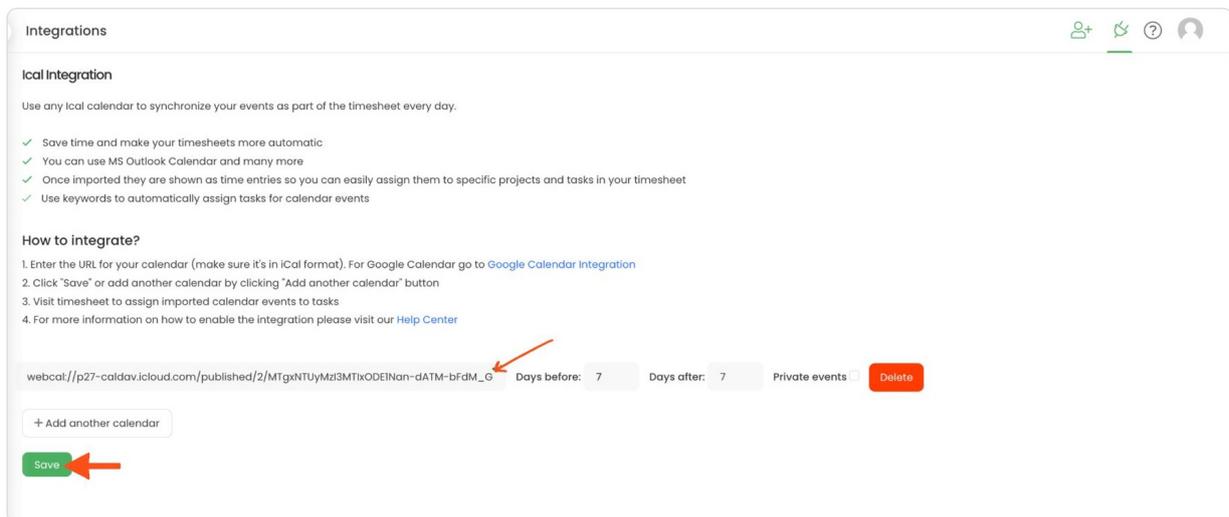

1. Log in to your iCloud and open the Calendar app;
2. Click on the "wireless" icon next to the calendar you'd like to integrate;

3. Click **Public Calendar** and copy the given URL (it starts with *webcal*);

4. Input the URL into the proper field in TimeCamp integration settings;

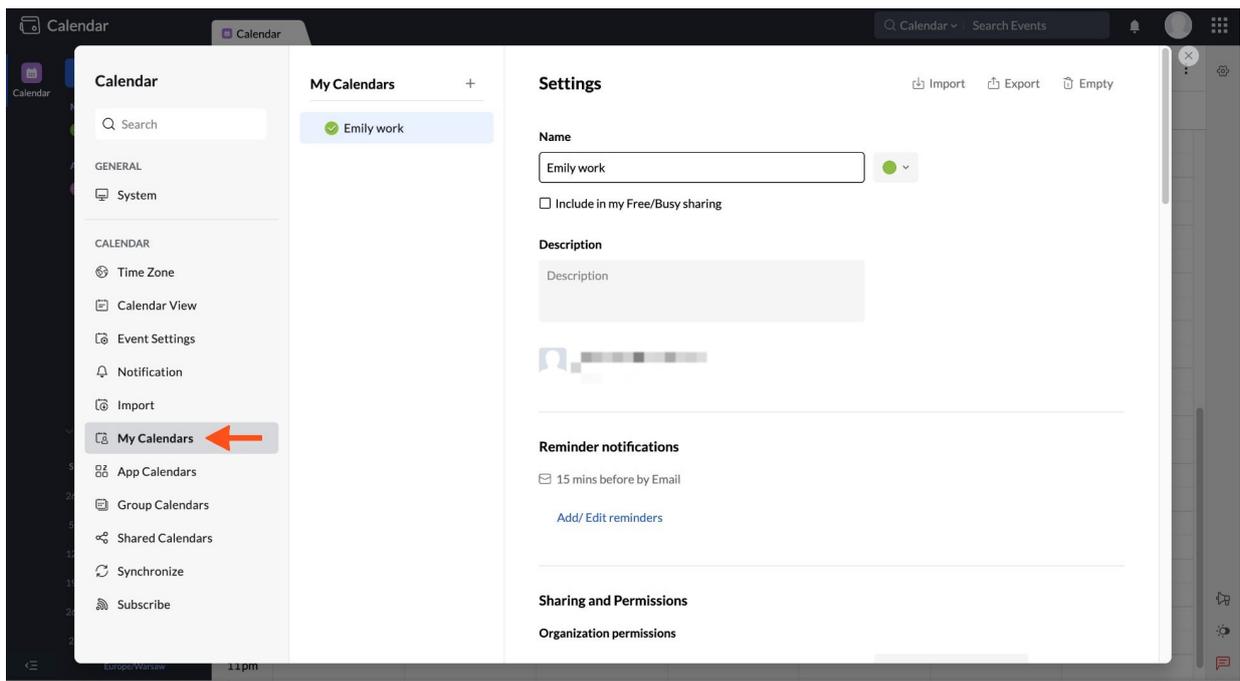

Desktop Apple Calendar also can contain the iCal link but first, calendar should be marked as Public in iCloud.

Zoho Calendar

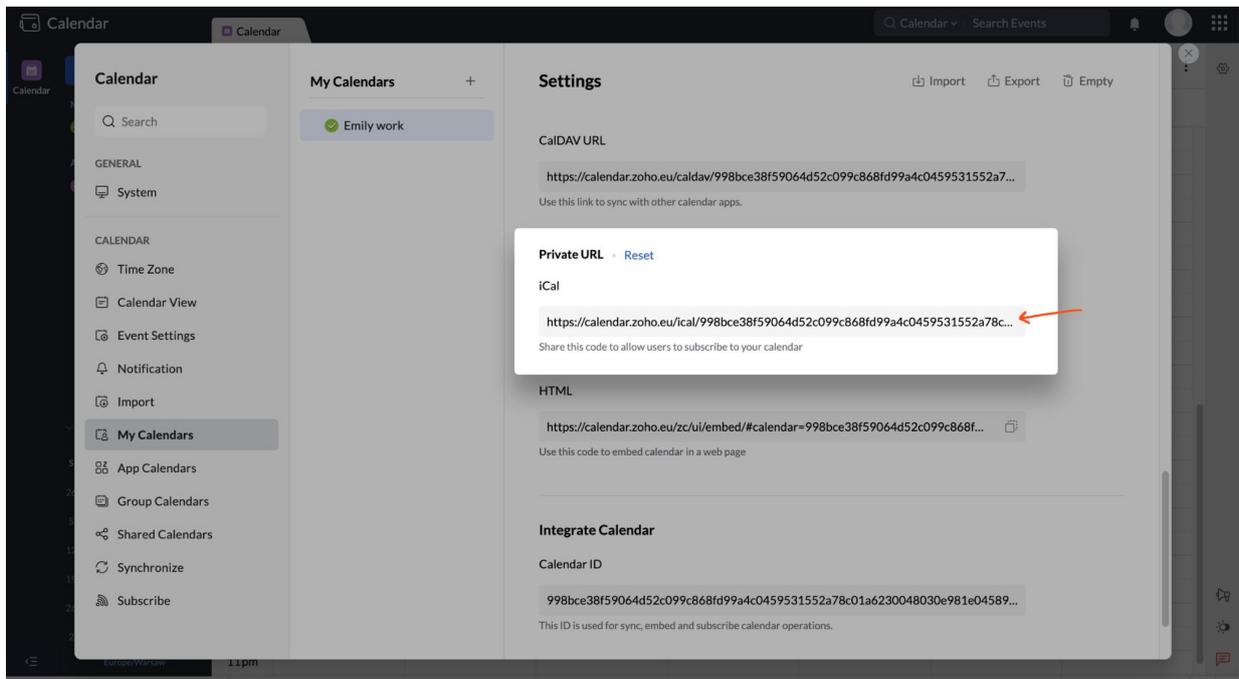

1. Navigate to your **Settings** in the upper-right corner;

2. Open **My Calendars** tab on the left side menu;

3. Select calendar from the list and scroll down to its **Private URL** section to copy the iCal link;

4. Input the iCal link into the proper field in TimeCamp integration settings;
