Expenses - Basics

In this article:

- Enable Expenses
- Settings
- Permissions

The Expenses feature is designed to help track, categorize, and manage your spending. You can decide if expenses should be billable or not, assign them to specific projects and divide them into categories. Each category can have its own custom measure unit and price.

Expenses are available in the Ultimate plan. Billing and Time Tracking modules are required in order to use Expenses.

Enable Expenses

Only the Administrator of the account can enable the Expenses feature.

To enable the Expenses feature, click on your avatar in the upper-right corner and select the **Account Settings** option. Next, go to the **Modules** tab, find the **Expenses** module, and click on the **switch button** to enable Expenses.

Settings

After the module is enabled you can set up Expenses Categories according to your organization's needs.

To open the Expenses settings and set up your account click on the "gear" icon next to Expenses.

Here you can predefine **Expenses categories** that are required for adding expenses. Categories can be used by all users within the account.

To create a category click on the **New Category** button.

Next input a category name, pick a color and define if category should have a unit price.

If you enable the unit price you can input its **price value** and type the **name of unit you measure** (e.g. hour, mile, product, etc.)

Permissions

Permissions in the Expenses section are based on account roles.

You can learn more about account roles from this article.

In TimeCamp we provide 4 account roles:

- Administrator
- Supervisor
- User
- Guest

Administrator - will have access to all expenses added by other Administrators, Supervisors and Users from the group they manage and its subgroups;

Supervisor - will have access to all expenses added by Users from the group they manage and its subgroups;

User - will have access only to expenses they added;

Guest - will be able only to view expenses that belong to projects they are assigned to;
